ACKNOWLEDGEMENTS

“That person may safely venture on its way,
who is so guided, that it cannot stray.”

Throughout this long and arduous journey of Ph.D, whenever I embarked on the rough patch, two pairs of hand would come to usher me back on track. Needless to mention that those divine pairs of hands were of my Guides Dr. P. R. Sharma and Dr. Maneesha Garg. I find myself in dire dearth of words, when it comes to express my gratitude for them for making this thesis a reality. The seemingly mountains would simply become moles whenever I discussed the problems with Dr. P. R. Sharma. Such is the charisma of his precious treasure of his knowledge and experience. The fear and diffidence has always turned into courage and confidence whenever I had Dr. Maneesha Garg around me. She’s in true sense a woman of substance. I truly feel indebted to Almighty for blessing them in form of my guides.

A constant stream of inspiration has always flown to me from Dr. Vishal Verma, Professor, Delhi Technological University, the doyen of teaching, who is my role model. I express my most pristine respects for him for selflessly showering his guidance at every step.

May I implore Dr. A. K. Sharma Dr. S. K. Aggarwal, and Dr. Rajesh Ahuja to please accept my sincere most gratitude for making my work practically possible. His cooperation, guidance have gone a long way to complete this work.

Friends and family are never thanked to, but I have all the rights to express my reverence for elders and love for younger ones who have unconditionally compromised with their own comforts to accommodate my need to spend time on my work.

Last but not the least; I am extremely grateful to my alma-mater, M. D. University, Rohtak and YMCA University of Science and Technology for providing me the opportunity to pursue this prestigious degree and to make myself more capable to contribute better as a teacher.
