ACKNOWLEDGEMENTS

This work, I must admit, has been possible only by the grace and blessings of the Omnipresent, Omniscient and Omnipotent Pujya Chander Swami Ji Maharaj.

Foremost I would like to express my gratitude to my esteemed supervisor Dr. (Mrs.) Pushpa Singal, Professor, Department of Human Biology, Punjabi University, Patiala for her constant help and guidance as and when sought. She has been a great source of inspiration to me throughout this task. I am immensely benefited by her life long experience, scientific skill, critical depth and analytical bent. It goes without saying that this work has been accomplished with her benevolence and generosity.

I owe a special debt of gratitude to my co-supervisor Dr. (Mrs.) S. K. Bawa, Dean, Lovely Faculty of Education, Lovely Professional University, Phagwara for her creative guidance, sustained encouragement, constructive criticism and vital suggestions throughout the tenure of the investigation. My sincere thanks to Dr. D.P. Bhatnagar, retired Professor, Department of Human Biology for his valuable suggestions and encouragement throughout the period of study.

I convey my sincere obligate to Professor Promila Mehta, Head, Department of Human Biology for providing me the necessary facilities. I am thankful to all the faculty members of Human Biology Department for their suggestions from time to time. I feel greatful to Dr. Rajinder Kumar, Lab-Superintendent for his full cooperation and assistance.

Words are inadequate to acknowledge the love, motivation and moral support given to me by dearest parents, Dr. Dharmal Chawla and Mrs. Indira Chawla. Their positive view about situations and constant encouragement saw me through my difficult phases. I would also like to place on record my sincere gratitude and thanks to my in-laws. I wish to thank almighty for fond association and a most pleasurable relationship with my siblings, Amita, Anil and Munish.
With utmost sense of pride and pleasure I put on record my profound gratitude and feeling of appreciation for my husband Er. Vijay Thakral for his continued support throughout the course of this work. My efforts would not have been successful without the cooperation and patience of my daughters Arunima and Shatakshi.

It gives me immense pleasure to extend my warmest thanks to my friends Tejpreet, Sarita, Jagbir and Rajinder.

My special thanks are due to the principals and teachers and the school children who form the basis of this study for their co-operation and receptive attitude throughout the period of data collection. I would seize the opportunity to record my appreciations for the whole hearted help of Dr. Devinder Tiwari, Assistant Professor and Dr. M. Javed, Associate Professor for data analysis and preparation of illustrations.

I express my sincere thanks to S. Gurdeep Singh (ALPS Computer Center) for typing the manuscript and making required corrections and attractions at times even at odd hours.

I am profoundly grateful to the Department of Human Biology, Punjabi University for giving me an opportunity to carry out this academic venture.

I wish to record my special gratitude to any person my memory has failed to recall, who rendered their support and services in various capacities throughout the tenure of investigations.

(Asha Chawla)
