Respected Sir/Madam,

I am to submit that I am a registered student for the degree of Ph.D in Education, at A.G. Teachers' college, Ahmedabad-380 009. I work under the guidance of Dr. (Mrs) L.K. Patel. I am working as an Assistant Teacher in L.S. High School, Sidhpur. I have already started my research work on the following subject:

“The Preparation and Standardization of a Criterion-Referenced Test in Mathematics for the pupils of Std X in the Gujarat State”

For this purpose, I have prepared twelve well-defined behavioural domains of Trigonometry within the framework of the curriculum prescribed for the subject of Mathematics for Standard X of the secondary schools of Gujarat State. I enclose herewith a copy of the same. I request you to kindly express your opinion on it after examining the following aspects in this context:

1. Whether an objective formed on the basis of content is in agreement with text-book prescribed for standard X.

2. Whether the skills and competencies indicated by the domain of trigonometry can be assessed.
3 Whether the condition in which the skills and competencies are measured is appropriate for standard X.

4 Whether the language employed in formation of objective is clear, simple and free from the structural flows.

I assure you that the opinions expressed by you in this context will be utilized for the said research work only.

Thanking You,

With regards,

Yours Faithfully,

(K.B. Vyas)
