Appendix [A]

INSTRUCTIONS

A number of items have been formulated to measure how far a statement is relevant or irrelevant in measuring attraction continuum. Will you kindly read each statement as well as their factors and determinants and mark against it whether it's relevant [R] or irrelevant [I]. If necessary, you can modify it or correct it even from the viewpoint of language or syntax, as you think properly. Furthermore, if you feel any variances or ambiguity in understanding, mark [V] against it.

Thank you very much for your co-operation.
