ACKNOWLEDGEMENTS

It is difficult to express adequate gratitude to all my near and dear ones, but I must say that without them I would not be able to achieve my doctorate.

First and foremost, I would like to express my deep sense of gratitude to my guiding teacher and mentor, Dr. U.M. Rawal for giving me the opportunity to undertake this research under his supervision and for introducing me to this field of research. My interest in research has boosted by his expertise and constructive criticism. His continuous support has helped me to improve my work. Besides the professional relation, Dr. U.M. Rawal also shared a close personal rapport with me; I will always remain indebted to him for his father like support, continuous encouragement, inspiration and suggestions throughout the tenure of my investigation.

I am grateful to Dr. (Miss) N.J. Chinoy, Professor and Head of zoology department & Director of School of Sciences for granting me the laboratory facilities to carry out my work.

I am indebted to Dr. N.K. Jain for extending his experiences, advice and help in every capacity whenever I needed it.

It is a pleasure to acknowledge with thanks, the valuable cooperation of my colleagues Dr. Prajitha Thampi, Dr. Nilesh Kalariya, Dr. Ajit Pandya, Mr. Suneet Dabke, Mrs. Madhavi Kulkarni, Mr. Kaid Johar, Miss Deepa Bhatt and Mr. Harnil Trivedi. Their support has contributed tremendously towards my doctoral studies.

Profound thanks are due to Mr. B.C. Lakkad and Dr. A.B. Karnik of National Institute of Occupational Health, Ahmedabad for their help and suggestion during the course of this expedition.

I thank Mrs. Bindu Khakkhar for excellent assist and help during transmission electron microscopy; and I also thankful to all the other teaching staff and non teaching staff of the zoology department, School of Science, Gujarat University for their help in various way.

I heartful thanks Mrs. Jean D’souza and Miss Trupti Patel have always help to me in completing this treaties. I thank them sincerely for always being ready to lend a helping hand whenever I needed and for giving me a professional, emotional and moral support.
I also take this opportunity to sincerely thank Mr. Kalpesh Patel, my best friend, for his ever-willingness to solve my problems and to help me in so many different ways.

I am most thankful to Mr. Jignesh Sukhadia and Mr. Bharat Patel, who gave me a free hand with their computer facilities and their timely help in typing the thesis.

Blessed I was, to have the moral support and affection from my parents Mr. Pravinbhai Trivedi and Mrs. Ushaben Trivedi all the while. It was due to their sacrifices and perseverance that I remained steadfast throughout this long journey, words fail to express my deep reverence and gratitude to them. My familiar support would never be completed without the presence of my grandmother and my brother, Bhavin. The blessing of my grandmother and the love of my brother have been most essential in completion of this work.

I have also been lucky to have Mr. B.R.Shah as a loving and caring Father-Figure in my life, whose positive feedback with incessant help were vital for shaping this treatise. I would like to thank Mr. Nishith Shah as well, who has offered his helps and support to me for this work.

My heartfull of love is for my loving daughter Vagmi, who patiently co-operated all through my work by sacrificing the time of her golden childhood. Even though I have not been able to be a full-time mother to her due to my research, she has always been the emotional backbone that helped me move forward. I hope that one day she will understand my lack of time, and be proud of the work I have tried to accomplish.

Thank You.

NEHA TRIVEDI
