Acknowledgement

At the outset I would like to express my gratitude to my office colleagues for their sincere advice, together with invaluable input to conceive a theme in the line of this study, which otherwise would not have come into existence.

Once the idea was formed, Dr B H Desai became the steering force to get it through the path that was as usually infested with no less hurdles. I remain highly indebted to Dr Desai, the project guide, for his marvelous support by way of his priceless inputs, incredible efforts and selfless advice all along.

I am also thankful to Mr. N.N Dasgupta, who almost single-handedly did the job of distribution and collection of questionnaires that called for amazing patience.

I am no less thankful to my wife, Rita for making me free from household chores to fully concentrate on my study as well as for laying her faithful hands in the processing and tabulation of questionnaires.

Dr. Banibrata Ray and Dr Sreehari of MS University have given their valuable advice in statistical validation of data and I express my thankfulness to them.

I should also mention Mr. Ashok Jambhekar Librarian of IIM, Ahmedabad and of his kind courtesy for giving me access to its magnificently rich Library.

Finally, I express my sincere thanks to all the respondents, who have spent their valuable time in filling up the questionnaires that happen to be the backbone of this study.
