Chapter

I. Introduction

1.0 Introduction 2
1.1 Rationale 6

1.1.1 Intelligence 6
1.1.2 Anxiety 9
1.1.3 Need for Achievement 11
1.1.4 Caste 12
1.1.5 Family Size 13
1.1.6 Birth Order 14
1.2 Statement of the Problem 15
1.3 Definition of the Terms 16
1.4 Objectives of the Study 18
1.5 Limitations of the Study 19
1.6 Scheme of Chapterization 20

III A PEEP INTO THE PAST
  3.1 Introduction
  3.2 Researches done in foreign countries.
    3.2.1 Researches done in intelligence study 1 to 3
    3.2.2 Researches done on anxiety study 4 to 6
    3.2.3 Researches done on n-Ach study 7 to 9
    3.2.4 Researches done on Mathematical Concept and Mathematical Achievement study 10 to 12.
3.3 Researches done in India
3.3.1 Researches done on intelligence
Study 13 to 16
3.3.2 Researches done on anxiety
Study 17 to 19
3.3.3 Researches done on n-Ach
Study 20 to 22
3.3.4 Researches done on Mathematical
Concept and Mathematical
Achievement Study 23 to 26

3.4 Differentiation of this study.

IV PLANNING AND PROCEDURE

4.1 Introduction
4.2 Steps of Research Activity
4.3 Variables incorporated into the problem
4.4 Formulation of Hypotheses
  4.4.1 Hypotheses of the first phase
  4.4.2 Hypotheses of the second phase
  4.4.3 Hypotheses of the third phase
  4.4.4 Hypotheses of the fourth phase
4.5 Research Design

4.5.1 Factorial Design

4.6 Basic requirements of the four-phased Factorial Design.

4.7 Variables and selection of Measuring Tools

4.7.1 Caste

4.7.1.1 The pupil's Demographic Bio-data Pro forma

4.7.1.2 Ascertaining the pupil's caste.

4.7.2 Intelligence

4.7.2.1 Assessment of Intelligence

4.7.2.2 Desai-Bhatt Group Test of Intelligence

4.7.2.2.1 General Description of Desai-Bhatt, Group Test.

4.7.2.3 Administration and scoring of the Desai-Bhatt Group Test of Intelligence.

4.7.3 Assessment of Anxiety

4.7.3.1 The Adapted Boxall's Test of School Anxiety (BTSA)

4.7.3.2 Reliability of the Adapted Boxall's Test of School Anxiety.

4.7.3.3 Administration and Scoring of the Adapted Boxall's Test of School Anxiety.

4.7.4 Assessment of n-Ach

4.7.4.1 The Adapted Smith's n-Ach measure

4.7.4.2 Reliability of the Adapted Smith's n-Ach measure

4.7.4.3 Administration and scoring of the Adapted Smith's n-Ach measure.
4.7.5 Family Size

4.7.5.1 The pupil's Demographic Bio-data Proforma

4.7.5.2 Determining the pupils Family size.

4.7.6 Birth Order

4.7.6.1 The pupil's Demographic Bio-data Proforma.

4.7.6.2 Ascertaining the pupil's Birth Order.

4.7.7 Sex

4.8 Measuring Tools for Dependent Variables.

4.8.1 Construction of the Test

4.8.2 Pre-piloting of the Pre-Test

4.8.3 Pilot Testing

4.8.4 Evaluation of Answer Sheets

4.8.5 Item Analysis

4.8.6 Final Test

4.8.7 Reliability of the Test

4.8.7.1 Test-Retest Method

4.8.7.2 Split - Half Method

4.8.8 Validity of the Test

4.8.8.1 Concurrent Validity

4.8.9 Tool for measuring Mathematical Achievement

4.9 Selection of Sample

4.10 Data Collection

4.11 Statistical Techniques

V ANALYSIS AND INTERPRETATIONS

5.0 Introduction

5.1 Definition of Structural Model of the Score

5.2 ANOVA: Its Need
   5.2.1 Assumptions for ANOVA

5.3 Homogeneity of Variance Test

5.4 Procedure of the Analysis

5.5 Plan of Testing Hypotheses

5.6 Relevant Data for Mathematical Concept

5.7 Testing of Hypotheses
   5.7.1 Main Effects: Phase One
   Study - 1: Caste vis-a-vis Mathematical Concept
   Study - 2: Intelligence vis-a-vis Mathematical Concept
   Study - 3: Anxiety vis-a-vis Mathematical concept
   Study - 4: Sex vis-a-vis Mathematical concept

5.7.2 The Interactive Effects: Phase One
   Study - 5: Caste x Intelligence (A x B) vis-a-vis Mathematical Concept
   Study - 6: Intelligence x Anxiety (B x C) vis-a-vis Mathematical Concept
   Study - 7: Caste x Intelligence x Anxiety (AxBxC) vis-a-vis Mathematical Concept
   Study - 8: Caste x Anxiety x Sex (AxCxD) vis-a-vis Mathematical Concept
   Study - 9: Intelligence x Anxiety x Sex (BxCxD) vis-a-vis Mathematical concept

5.7.3 Components of Variance: Phase One
   Study - 10: Components of Variance of the Mathematical Concept Scores
5.8 Hypotheses Concerning MCS : Phase Two

5.8.1 Main Effects : Phase Two

5.8.2 Testing Hypotheses of Main Effects Phase Two.

Study - 11 : n-Ach vis-a-vis Mathematical Concept

Study - 12 : Family size vis-a-vis Mathematical Concept

Study - 13 : Birth Order vis-a-vis Mathematical Concept

Study - 14 : Sex vis-a-vis Mathematical Concept

5.8.3 Interactive Studies : Phase Two

Study - 15 : n-Ach x Family size (A x B) vis-a-vis Mathematical Concept

Study - 16 : n-Ach x Sex (A x D) vis-a-vis Mathematical Concept.

5.8.4

Study - 17 : Components of Variance of Mathematical Concept Score (MCS)

5.9 Studies Concerning Phase Three

5.9.1 Testing Hypotheses of Main Effects Phase Three.

Study - 18 : Caste vis-a-vis Mathematical Achievement

Study - 19 : Intelligence vis-a-vis Mathematical Achievement

Study - 20 : Anxiety vis-a-vis Mathematical Achievement

Study - 21 : Sex vis-a-vis Mathematical Achievement
5.9.2 Interactive: Phase Three

Study - 22: Caste x Intelligence (A x B) vis-a-vis Mathematical Achievement.

Study - 23: Caste x Sex (A x D) vis-a-vis Mathematical Achievement.

Study - 24: Caste x Intelligence x Sex (A x B x D) vis-a-vis Mathematical Achievement.

Study - 25: Intelligence x Anxiety x Sex (B x C x D) vis-a-vis Mathematical Achievement.

5.9.3

Study - 26: Components of Variance of Mathematical Achievement.

5.10 Studies Concerning Phase Four

5.10.1: Testing Hypotheses of Main Effects Phase Four.

Study - 27: n-Ach vis-a-vis Mathematical Achievement.

Study - 28: Family size vis-a-vis Mathematical Achievement.

Study - 29: Birth Order vis-a-vis Mathematical Achievement.

Study - 30: Sex vis-a-vis Mathematical Achievement.

5.10.2 Interactive Studies: Phase Four

Study - 31: n-Ach x Family size (A x B) vis-a-vis Mathematical achievement.

5.10.3:

Study - 32: Components of variance of Mathematical Achievement Score (MAS)

## VI OBSERVATIONS, CONCLUSIONS AND SUGGESTIONS

6.1 Introduction  
   - 6.1.1 Variables  
   - 6.1.2 Research Design  
   - 6.1.3 Tools used  
   - 6.1.4 Sample  

6.2 Conclusion  
   - 6.2.1 Phase One: Mathematical Concept  
   - 6.2.2 Phase Two: Mathematical Concept  
   - 6.2.3 Phase Three: Mathematical Achievement  
   - 6.2.4 Phase Four: Mathematical Achievement  

6.3 Aggregate Message of the Research  

6.4 Suggestions for further Research
