CHAPTER 1: WIRELESS SENSOR NETWORKS

1.1 Introduction

1.2 Literature Review

1.2.1 Low Power Embedded Processor

1.2.2 Memory / Storage

1.2.3 Radio Transceiver

1.2.4 Sensors

1.2.5 Geo Positioning System

1.2.6 Power Source

1.3 Wireless Sensor Network Application Areas

1.3.1 Ecological Habitat Monitoring

1.3.2 Military Surveillance and Target

1.3.3 Structural and Seismic Monitoring

1.3.4 Industrial Applications
1.4 Design Challenges

1.4.1 Extended Lifetime

1.4.2 Responsiveness

1.4.3 Robustness

1.4.4 Synergy

1.4.5 Scalability

1.4.6 Heterogeneity

1.4.7 Self Configuration

1.4.8 Self Optimization and Adaptation

1.4.9 Privacy and Security

1.5 Selection of Research Domain

1.6 Objectives of Research Work

1.7 Thesis Structure

CHAPTER 2: TERRAIN INVESTIGATIONS OF ROUTING PROTOCOLS IN WIRELESS SENSOR NETWORKS

2.1 Introduction

2.2 Bellman-Ford Routing Protocol - Static Protocol

2.3 Routing Information Protocol - Distance Vector Based

2.4 Dynamic Source Routing Protocol - On Demand Based

2.5 Ad Hoc on Demand Distance Vector Routing Protocol

2.6 Dynamic on Demand Based Protocol

2.7 Linear Battery Model

2.8 Service Life Estimator Battery Model

2.9 Performance Evaluations of Routing Protocols
### CHAPTER 3: SCALABILITY ASSESSMENT AND ENERGY MODELS REALIZATION IN WIRELESS SENSOR NETWORKS

CHAPTER 4: ENHANCED WIRELESS SENSOR NETWORKS
WITH TRUST AND REPUTATION MODELS

4.1 Introduction

4.2 Trust and Reputation Models in Wireless Sensor Networks
   4.2.1 Eigen Trust Model
   4.2.2 Peer Trust Model
   4.2.3 BTRM-WSN Trust Model
   4.2.4 Power Trust Model
   4.2.5 Linguistic Fuzzy Trust Model (LFTM) Model

4.3 Malicious Server Investigations
   4.3.1 Accuracy Concerns
   4.3.2 Path Length Estimations
   4.3.3 Energy Consumption

4.4 Evaluation of Static, Dynamic and Oscillatory Wireless Sensor Networks
   4.4.1 Accuracy Analysis
   4.4.2 Path Length Analysis
   4.4.3 Energy Consumption Analysis

4.5 Collusion Based Realizations of WSN
   4.5.1 Accuracy Realization
   4.5.2 Path Length Realization
   4.5.3 Satisfaction Realization
   4.5.4 Energy Concerns

4.6 Summary
CHAPTER 5: OPTIMIZED EVALUATION OF ROUTING PROTOCOLS WITH SENSOR NODE DISTRIBUTION STRATEGIES

5.1 Introduction .......................................................... 93

5.2 Data Dissemination Protocols .................................. 93
   5.2.1 Classical Flooding Protocol (FP) ......................... 93
   5.2.2 Gossiping Protocol ........................................... 95

5.3 Setup Details for Data Dissemination Protocols Evaluation .................. 97

5.4 Event Based Evaluations ........................................... 99

5.5 Sensor Distributions ................................................. 105

5.6 Sensor Node Distributions Strategies ............................. 105
   5.6.1 Normal Distribution (ND) ................................. 107
   5.6.2 Gamma Distribution (GD) ................................ 107
   5.6.3 Exponential Distribution (ED) ......................... 108
   5.6.4 Beta Distribution (BD) ...................................... 109
   5.6.5 Generalized Inverse Gaussian Distribution (GIGD) .... 110
   5.6.6 Poison Distribution (PD) .................................. 110
   5.6.7 Cauchy Distribution (CD) ............................... 111
   5.6.8 Weibull Distribution (WD) ................................. 112

5.7 Simulation Setup for Distribution Strategies Investigations ................. 113

5.8 Event Based Analysis of Flooding and Gossiping Protocol ................. 114

5.9 Node Distributions versus Operational Metrics .......................... 119

5.10 Degree of Freedom (DOF) and Scalability Overview ....................... 120

5.11 Chi-Squared Distribution ........................................... 120

5.12 Detailed Setup for Scalability Investigation ............................ 122
5.13 Evaluation of DOF versus Scalability  
5.14 Data Dissemination Protocols, distribution strategies and Scalability
  
Summarization  

CHAPTER 6: CONCLUSIONS AND FUTURE SCOPE

6.1 Conclusion

6.2 Recommendations for Further Work
