ACKNOWLEDGEMENT

It’s a great indulgence to put forward my sincere prayers to my LORD for given me cerebral strength and never die attitude to complete this work successfully.

Lord never come to you in what form he is; so he came in the form of my guide Prof. D.D. Santani, B.Pharm., M.Sc (Pharmacology), PhD, Head, Department of pharmacology, LM College of Pharmacy, Ahemedabad. I put across my immense pleasure to him for his excellent guidance, not only in the research work, for his interest in my career and being a role model in teaching profession. I have to find words to pay tribute to him for his constant cooperation, productive criticism, hospitality and kindness during my stay in the department.

I am thankful to Prof. Mukesh C. Gohel, M.Pharm, PhD, Principal, LM College of Pharmacy, Ahemedabad for provided necessary facilities and support to undertake this study. I am also grateful to the university authorities for their help to register this for the award of the degree.

I am very much thankful to Dr. Mahesh Chhabria, M.Pharm, PhD, Department of Pharmaceutical Chemistry, LM College of Pharmacy, Ahemedabad, for his invaluable suggestions and timely critics that helped to learn a lot to comprehend the work effectively.

I would never forget the valuable ideas that given to design the work and for facilities provided to carryout psychopharmacological activities, from Prof. Jaswanth, M.Pharm, PhD, Department of Pharmacology, Periyar College of Pharm. Sciences for girls, Trichy.

It would bliss to greet Prof. S. N Pandeya, PhD, former head, Department of Pharm. Chemistry, Institute of technology, Banaras Hindu University, Varanasi (alma mater), for his constructive words and advice that given me power and support to complete the studies.
I am thankful to my dear most friends Mr. J. Venkatesan, M.Pharm, PGDCAQM, Lecturer, BIT-Ranchi and Mr. Asraf Ali, M.Pharm, Hamdard University for their constant support and criticism in the research work carried out.

I would like to place on records with deep gratitude the valuable support from my colleague Dr. Sanjay Kadnur, M.Pharm, PhD and Dr. Prashanth kumar, M.Pharm, PhD for their constant support during my breathe in Ahmedabad.

I am very much gratified to Dr. P. Stables, Anticonvulsant Screening Programme, NIH for the screening of the test compounds against different models, that given me the idea to generate further to carry out this study.

I am also thankful to my friends in PERD centre, Ahmedabad and Zydus Research Centre, Ahmedabad for provided me spectral data for the synthesized compounds without that it might have been an economic constraint to complete the characterization studies.

I seldom forget the help I had from my friends Prof Jeyabalan, M.Pharm, PhD Mr. Williams, M.Pharm and Mr. Babu Thandapani M.Pharm for their moral assistance in each point of my study. I am strongly grateful to Prof KR Arumugam, M.Pharm Principal, Ultra College of Pharmacy for fervor approach towards me from my alma mater.

Finally I would like to dedicate my every move and outcomes to the persons who shown me the world of good and bad, happy and sorrow, that moulded me to come out with great success.

(Mr. D. SELVAKUMAR)
