LIST OF FIGURES

3.1 Cognitive and behavior model to HACCP principle adherence
3.2 HACCP awareness to adherence model
4.1 Awareness regarding pond preparation aspects
4.2 Awareness regarding fertilization aspects
4.3 Awareness regarding Water quality management aspects
4.4 Awareness regarding seed quality and stocking aspects
4.5 Awareness regarding feed management aspects
4.6 Awareness regarding chemicals management aspects
4.7 Awareness regarding disease management aspects
4.8 Awareness regarding harvesting and post harvest handling aspects
6.1 Awareness regarding Broodstock management aspects
6.2 Awareness regarding Spawning and hatching management aspects
6.3 Awareness regarding Larval management aspects
6.4 Awareness regarding Postlarval management aspects
6.5 Awareness regarding feed management aspects
6.6 Awareness regarding algal culture aspects
6.7 Awareness regarding Artemia culture aspects
6.8 Awareness regarding Seawater quality management aspects
6.9 Awareness regarding Chemicals management aspects
6.10 Awareness regarding Health management aspects
6.11 Awareness regarding Infrastructural aspects
6.12 Awareness regarding General aspects
7.1 HACCP Support Network
7.2 The Pre Requisite Programs for a Shrimp farm
7.3 Control point differentiation
7.4 Generic flow diagram for catering operations
7.5 Generic Aquaculture Process Flow Chart
7.6 Safety and Quality management in Process control
7.7 Food Safety within a Quality Management Program
7.8 Safety and Quality management
7.9 Safety and Quality management model for Shrimp farming
8.1 The Pre Requisite Programs in a Shrimp hatchery
8.2 Operational Flow Diagram
8.3 Hazard Analysis
8.4 The process control model for the shrimp hatchery
8.5 Safety and Quality management model for Shrimp hatchery
LIST OF TABLES

2.1 Standards for Farm Effluents
2.2 Guidelines for wastewater from coastal aquaculture farms in India
2.3 Required categories of staff in a shrimp hatchery
2.4 Standards for source water and water at the final discharge point
2.5 Seed specifications
2.6 List of antibiotics banned for use in aquaculture
2.7 Logic sequence for the application of HACCP.
2.8 Establishing the HACCP System in a Food Company
2.9 Pre requisite programmes commonly used in food processing industry
2.10 Interventions used in beef animal production and slaughter
2.11 Good Agricultural Practices for produce production and harvest
3.1 Interpretation table for chloramphenicol
3.2 Standard reference table for chloramphenicol
4.1 Barriers to HACCP principles adherence by the shrimp farmers
4.2 Awareness regarding pond preparation aspects
4.3 Awareness regarding fertilization aspects
4.4 Awareness regarding Water quality management aspects
4.5 Awareness regarding seed quality and stocking aspects
4.6 Awareness regarding feed management aspects
4.7 Awareness regarding chemicals management aspects
4.8 Awareness regarding disease management aspects
4.9 Awareness regarding harvesting and post harvest handling aspects
4.10 Selected items of HACCP prerequisite programs practices
4.11 Areas of Poor Knowledge of the Shrimp Farmers
4.12 Areas of Poor Practice and observation
4.13 PRP attitude of the shrimp farmers
4.14 Rank based quotients of major constraints in Shrimp farming
5.1 Physico-chemical parameters of Shrimp farm waters
5.2 Quality Tolerances for brackish water for commercial Shrimp culture
5.3 Optimum Water quality parameters for brackish water Shrimp culture
5.4 Bacteriological parameters of Farm water, Sediment and Shrimp Muscle
5.5 Pathogenic Bacteriae in Farm water, Sediment and shrimp
5.6 EU/FDA Standards for fresh frozen shrimp
5.7 Pesticide content in Farm water
5.8 Pesticide Content in Farmed Shrimp
5.9 Maximum Recommended Level for Pesticides
5.10 Heavy Metal Content in Shrimp Farm water
5.11 Heavy Metal Content in Farmed Shrimp
5.12 Maximum Recommended Level for Heavy Metals
5.13 Maximum Recommended Level for Antibiotics
5.14 Sulphite content at various stages of processing
6.1 Barriers to HACCP principles adherence by the hatchery operators
6.2 Awareness regarding Broodstock management aspects
6.3 Awareness regarding Spawning and hatching management aspects
6.4 Awareness regarding Larval management aspects
6.5 Awareness regarding Postlarval management aspects
6.6 Awareness regarding feed management aspects
6.7 Awareness regarding algal culture aspects
6.8 Awareness regarding Artemia culture aspects
6.9 Awareness regarding Seawater quality management aspects
6.10 Awareness regarding Chemicals management aspects
6.11 Awareness regarding Health management aspects
6.12 Awareness regarding Infrastructural aspects
6.13 Awareness regarding General aspects
6.14 Selected items of HACCP prerequisite programs practices
6.15 Areas of low knowledge
6.16 Areas of Poor Practice
6.17 PRP Attitude of hatchery operators
6.18 Rank based quotients of major constraints in hatchery operations
7.1 Differentiation of Quality and hygiene issues
7.2 Flow chart for the production of aquacultured shrimp
7.3 Hazards associated with aquaculture products
7.4 Hazard Analysis for Shrimp Aquaculture Production
7.5 Hazard Analysis Worksheet for shrimp farming
7.6 The HACCP Planform for shrimp farming
8.1 Water quality requirements at a hatchery site
8.2 Differentiation of Quality and hygiene issues
8.3 Flow Chart for the production of Postlarvae
8.4 Hatchery Production of Shrimp Seed
8.5 HACCP Plan Form
