ACKNOWLEDGEMENT

Water is one of the five elements and life on earth virtually depends on it. Life is believed to have originated in water. It is impossible to even think of any development without water, as it is the most critical and key resource for sustainable development.

This dissertation is an attempt to substantiate the thesis that water is the elixir of life, an essential and indispensable input for development and its management has ever been a challenge to mankind due to its multiple dimensions and several variable factors. To handle such a complex subject would have been completely beyond the realm of my understanding, but for the valuable inspiration, timely guidance and critical but creative suggestions, given from time to time, by Prof. V. P. Bharadwaj, Former Head, Department of Economics and Former Director, School of Social Sciences, Gujarat University, Ahmedabad, my guide, this has been possible for me to undertake this task with great ease. It is his profound knowledge, intellectual verve and long experience which enabled me to clearly understand the various dimensions of this complex subject. I am, indeed, deeply indebted to him for his keen interest from the beginning to the end, generous support and close scrutiny on both the content and style of this thesis. He relentlessly reviewed, appraised and questioned every aspect of the narration, incorporated in this dissertation, and, thus, provided me both invaluable guidance and motivation which led me to accomplish this task.

I gratefully acknowledge the support so kindly and willingly extended at the formative stage of this thesis by Shri Sudhirbhai Nanavati, Hon. Secretary, GLS, Ahmedabad, Shri N. R. Shah, Executive Director, GLS, Ahmedabad, and Prof. M. N. Desai.

Prof. C. B. Raval, Officiating Principal, H. A. College of Commerce, Ahmedabad, was gracious enough to support my endeavor for which I’m thankful to him.

My colleagues and friends at H. A. College of Commerce, Ahmedabad, also deserve my thanks for their understanding and cooperation.
I take this opportunity to express my gratitude to Shri S. S. Rathod, Secretary, Narmada, Water Resources, Water Supply & Kalpsar Department, Shri V.S. Gadhvi, Secretary, (Water Supply), Narmada, Water Resources, Water Supply & Kalpsar Department, Shri D. N. Pandey (I.A.S.), Member Secretary, Gujarat Ecological Commission, Shri B. R. Patel, Joint Director, Bureau of Economics and Statistics, Gandhinagar, Shri R. M. Patel, Personal Secretary to the Minister, Narmada, Water Resources, Water Supply & Kalpsar Department for providing useful and relevant information without which my task of handling this subject would not have been so smooth.

I thank Dr. M. B. Joshi, Executive Engineer, Sardar Sarovar Narmada Nigam Ltd., for providing critical data without which this task would have remained incomplete.

I am equally thankful to Prof. Shivanand Swami, Asst. Director, CEPT, Ahmedabad, for his notable contribution in providing excellent material which sharpened my skills and widened my understanding of the subject. Special credit is due to Prof. Anjanaben Vyas, Head, Goematics Dept., CEPT University, for providing valuable references.

I cannot forget the assistance provided by Prof. Parth Joshi, Uma Arts and Nathiba Mahila Commerce College, Gandhinagar, who has been an unfailing source for supplying material which has proved a fruitful and credible input of ready reference.

I'm grateful to Prof. Nikhil Bhatt and Prof. Digvijay Gohil of Sahajanand Arts and Commerce College, Ahmedabad, for extending assistance whenever I needed during the period of my research and study.

I'm equally thankful to Shri Jigneshbhai Bhatt of Com and Media Point, who spared time from his busy schedule to provide me timely support every time I had ‘computer’ problems.

I am thankful to my close friends Dr. Sangeeta Ghate, Principal, Umiya Arts and Commerce College for Girls, Ahmedabad, Mrs. Mitali Mitra, Economics Department, Ahmedabad International School, Ahmedabad, and Mrs. Kavita Shah, for their support, encouragement and endless patience.
Shri Dineshbhai Yadav of Jigar Xerox also deserves my special thanks for helping me in the task of formatting my thesis.

I have been fortunate in receiving exceptionally homely hospitality from Mrs. Bharadwaj, Manju Aunty, in an amiable ambience during my visits to Prof. Bharadwaj to seek guidance. Her presence always elevated my spirits and inspired me to fulfill my cherished dream of accomplishing this task in time for which I will ever remember her with gratitude.

I express my sincere gratitude to Veena Aunty and Dr. M. P. Bhatt, RMO (Retd), Health Center, Gujarat University, for their concern and good wishes.

I’m indebted to Shri B. A. Shukla for his continuous blessings and personal interest.

At this juncture I cannot forget Ms. Manisha Verma, I. I. S., my sister, Joint Director, Yojana, MoIB, GOI, for her spontaneous support and creative observations in helping with the research from its very inception. I am equally thankful to Minali Verma, my sister, and Niraj Shah, my brother-in-law, for their continuing moral support.

I owe my debt to Chiragbhaiya, Jignabhabhi and Sachi, who have been a source of inspiration and motivation from all the way from Canada.

Dr. Siddharth Thaker, my husband, deserves a special mention whose initiative, support and encouragement helped me to shape my early notions for undertaking this task.

The last word of acknowledgement gratefully goes to Dr. C. H. Thaker, Professor (Retd.), Department of Economics, School of Social Sciences, Gujarat University, and Smt. Jayshreeben Thaker, my parents-in-law, and also to Shri S. L. Verma I.A.S. (Retd.) and Smt. Kamala Verma, my parents, who have taught me the values of hard work, initiative and excellence through personal example.
