LIST OF FIGURES

Fig. I.1. Location of the study area: Ahmedabad Agglomeration (with sub-regions). 13

Fig. II.1. Use of GIS: Flow charts of variables related to water-borne diseases in Ahmedabad (1993) using the software of Geographic Information System (GIS). 48

Fig. II.2. Overlaying Data base 49

Fig. III.1. Occurrence of water-borne diseases in Gujarat, 1995. 75

Fig. III.2. Distribution of water-borne diseases in main (six) cities of the Gujarat, 1995. 79

Fig. III.3. Index number of Ahmedabad and Rajkot city of Gujarat state (1989-1993) 80

Fig. IV.1. Cases on the 4th day and previous day of rainfall during 1989-93. 88

Fig. IV.2. Water-borne diseases by season over time (1989-93) 93

Fig. IV.3. Multi-ternary diagram to show four major water-borne diseases by season and over time (1989-1993) 95

Fig. IV.4. Month-wise distribution of water-borne diseases (1989-93) 96

Fig. IV.5. Population growth in Ahmedabad (1901-1991) 99

Fig. IV.6. Sex-wise diseases in Ahmedabad over time (1989-1993) 101

Fig. IV.7. Diseases by age-group over time (1989-1993) 102

Fig. IV.8. Scatter diagram to show income and diseases, 1993 106
Fig.IV.9. Income and diseases, 1993 106
Fig.IV.10. Scatter diagram to show literacy and diseases, 1993 108
Fig.IV.11. Literacy and diseases (1993) 109
Fig.IV.12. Religion and diseases. 111

Fig.V.1. Schematic diagram showing relationship of various factors with water-borne diseases 114
Fig.V.2. Availability of drinking water per person per day, 1993. 123
Fig.V.3. Amount of drinking water-needed per person per day, 1993. 125
Fig.V.4. Inner environment : Housing amenities (with separate bath-room), 1993 129
Fig.V.5. Inner environment : Housing amenities (with separate toilet), 1993 131
Fig.V.6. Inner environment : Housing facilities (with separate kitchen), 1993 134
Fig.V.7. No. of rooms per house, 1993 138
Fig.V.8. Inner environment : Cleanliness of house, 1993 140
Fig.V.9. Location of slums within AMC area, 1991 144
Fig.V.10. Total inner environment of houses with GIS, 1993 146
Fig.V.11. Water logged areas by sewerage, 1993 149
Fig.V.12. Water logged areas by rain water, 1993 151
Fig.V.13. Drawing showing Bridges and Sewerage outfall points into river Sabarmati, 1993 156
Fig.V.14. Overall cleanliness of area in Ahmedabad, 1993 161
Fig.V.15. Total outer environmental quality with GIS, 1993 163
Fig.V.16. Behavioural factor : Purification of drinking water by different methods, 1993 168
Fig.V.17. Behavioural factor: Cleaning of water-tank, 1993

Fig.V.18. Behavioural factor: Habits of eating out, 1993.

Fig.VI.1. GIS overlay of Drinking water factor, 1993

Fig.VI.2. Classification of environmental quality with GIS
   (Inner and Outer environmental factors, 1993)

Fig.VI.3. GIS overlay of Behavioural factor, 1993

Fig.VI.4. Total Environmental quality with GIS of three major factors, 1993

Fig.VII.1. Trendline showing the temporal pattern of water-borne diseases in Ahmedabad (1989-1993)

Fig.VII.2. Temporal distribution of water-borne diseases in Ahmedabad (1989-1993)

Fig.VII.3. Distribution of Gastro-enteritis and its trend of occurrence in Ahmedabad (1989-1993)

Fig.VII.4. Distribution of Viral Hepatitis and its trend of occurrence in Ahmedabad (1989-1993)

Fig.VII.5. Distribution of typhoid and its trend of occurrence in Ahmedabad (1989-1993)

Fig.VII.6. Distribution of Cholera and its trend of occurrence in Ahmedabad (1989-1993).

Fig.VII.7. Spatial Distribution of Gastro-enteritis (mean of 1989-1993) in Ahmedabad

Fig.VII.8. Spatial distribution of Viral Hepatitis (mean of 1989-1993) in Ahmedabad.
Fig. VII.9. Spatial distribution of typhoid
(mean of 1989-1993) in Ahmedabad. 233

Fig. VII.10. Spatial distribution of Cholera
(mean of 1989-1993) in Ahmedabad. 236

Fig. VII.11. Spatial distribution of four major water-borne diseases by ward, 1989 242

Fig. VII.12. Spatial distribution of four major water-borne diseases by ward, 1990 243

Fig. VII.13. Spatial distribution of four major water-borne diseases by ward, 1991 244

Fig. VII.14. Spatial distribution of four major water-borne diseases by ward, 1992 245

Fig. VII.15. Spatial distribution of four major water-borne diseases by ward, 1993 246

Fig. VII.16. An overlay of spatial distribution of four diseases with mean centres of concentration for five years (1989-1993) 247

Fig. VII.17. Spatial Lorenz curve showing four major water-borne diseases in Ahmedabad, 1991. 251

Fig. VII.18. Concentration of water-borne diseases by location quotient, 1991 254

Fig. VII.19. Environmental behavioural model: weighted by average of diseases of five regions of Ahmedabad, 1993. 256

Fig. VII.20. Schematic diagram of spatial distribution of water-borne diseases: distribution by level of intensity for five years with GIS overlay. 250

Fig. VII.21. Distribution by diseases (with intensity of high and very high occurrence) 259-260
