ACKNOWLEDGEMENT

My greatest debt is to Prof. M. Raghavachari. He not only helped me identify the research area but also guided at each juncture. There were times when I was totally at a loss - but his tremendous insight and experience always came to my aid and pulled through.

My thanks to Dr. J.L. Saha, Dr. C.G. Khatri, Dr. M.C. Jaiswal, Dr. A.V. Gajjar and Dr. I.D. Patel for their help at various stages of work. It is impossible to appropriately acknowledge the help of my friends, Rita, Kamini, Rohini, Bhavna and Gita in writing and running the computer programmes. I am very much grateful to Lakshminarayan who helped me in proof reading the typed work. Finally I thank P. Rajagopalan for his painstaking effort in typing this thesis.

To my mother, I owe a special debt for her constant encouragement and providing facilities at home.
