European Bioinformatics Institute: Introducing AtMIAMExpress, a submission tool for Arabidopsis gene expression data to ArrayExpress. Plant Physiology 139, 632–636.

Tukey HB, Carlson RF (1945) Breaking the dormancy of peach seed by treatment with thiourea. Plant Physiology 20, 505-516.

drastically affects gene expression induced by high light in *Arabidopsis thaliana*. The Plant Journal 39, 45–58.

LIST OF PUBLICATIONS

[A] Papers published in peer-reviewed International Journal

[B] Reports

[C] Abstracts presented in national and international conferences

effector components of salinity stress tolerance. [Poster presented in Cold Spring Harbour Symposium on “From Plant Biology to Crop Biotechnology” held at Suzhou, China during October 25-29, 2010].

3. Srivastava AK, Ramaswamy NK, D’Souza SF (2007) Rapid transcriptome changes induced by thiourea reveal the role of calcium and calmodulin related proteins in multistress tolerance of Brassica juncea. Poster Presented in International symposium on “Calcium based signaling systems in plants” held at Dublin, Ireland during 5th-7th December, 2007 [Received New Phytologist Trust award].
