LIST OF FIGURES:

Figure 4-1 Historic influences in Barkur between megalithic times to 10th cent AD .. 38

Figure 4-2: Historic influences in Barkur between 10th cent AD to 13th cent AD ....... 39

Figure 4-3: Conjectural map of Barkur town plan of 16th century ......................... 43

Figure 4-4: Map of Barkur in 1906 as in Panchayat records .............................. 44

Figure 4-5: Map of Barkur as documented in 2008 by author .......................... 45

Figure 4-6: Graph showing Taluk wise growth of population in the district (1981-2001) ......................................................................................................................... 46

Figure 4-7: Map of Udupi district showing population in various towns and villages (census 2000). ................................................................. 47

Figure 4-8: Location of the four towns which are studied linked with a path which is almost in a line................................................................. 48

Figure 4-9: This figure shows the location of Barkur Panchalingeshwara temple as 13° 27’N and 74° 44’E................................................................. 50

Figure 4-10: The map of ‘ratha-beedi’ in Barkur .............................................. 51

Figure 4-11: The aerial image of ratha-beedi in Barkur .................................. 52

Figure 4-12: The extent of town of Barkur....................................................... 52

Figure 4-13: The figure shows the location of Brahmvara Mahalingeshwara temple ................................................................. 53

Figure 4-14: The ‘Ratha-beedi’ in Brahmvara .............................................. 54

Figure 4-15: Map of Brahmvara town.............................................................. 54

Figure 4-16: Aerial view of Udupi town........................................................... 55

Figure 4-17: The ‘Ratha-beedi’ in Udupi ........................................................ 56
Figure 4-18: The spread of urban development in *Udupi* .................................................. 56

Figure 4-19: Aerial view of temple square in *Basrur* .......................................................... 57

Figure 4-20: View of *ratha-beedi* in *Basrur* ...................................................................... 58

Figure 4-21: View of *Basrur* town ....................................................................................... 59

Figure 4-22: Map of *Basrur* town ....................................................................................... 60

Figure 4-23: Conjectural map of town plan in 14-16th century of *Udupi, Barkur, Brahmvara, and Basrur* ................................................................................................. 61

Figure 4-24: Map in 1900’s of *Udupi, Barkur, Brahmvara* and *Basrur* ......................... 62

Figure 4-25: Map as documented in 2008 of *Udupi, Barkur, Brahmvara* and *Basrur* ................................................................................................................................. 62

Figure 5-1: Land use of the past (1960) with area distribution ............................................. 64

Figure 5-2: Land utilization map of *Barkur* ........................................................................ 65

Figure 5-3: Land utilization of the present (2007) with area distribution............................ 65

Figure 5-4: Map near Panchalingeshwara showing the demarcation of convex spaces ................................................................................................................................. 66

Figure 5-5: Map near Panchalingeshwara showing generation of axial lines ................. 66

Figure 5-6: Map showing number of convex spaces and axial lines in option 1 ......... 67

Figure 5-7: Map showing number of convex spaces and axial lines in option 2 ...... 67

Figure 5-8: Map showing number of convex spaces and axial lines in option 3 ...... 68

Figure 5-9: Map showing number of convex spaces and axial lines in option 4 ...... 68

Figure 5-10: Concept diagram of axial link index .................................................................. 69

Figure 5-11: Axial link index of *Barkur* ............................................................................. 69
Figure 5-12: Concept diagram of convex space adjacency index .............................. 71
Figure 5-13: Convex space adjacency index of Barkur town ................................. 72
Figure 5-14: Concept diagram of index of depth ..................................................... 74
Figure 5-15: Index of depth of Barkur town ............................................................. 74
Figure 5-16: Concept diagram of axial connectivity index ....................................... 76
Figure 5-17: Index of Axial connectivity of Barkur town ........................................ 77
Figure 5-18: Concept diagram of axial space index ................................................ 79
Figure 5-19: Axial space index of Barkur town ......................................................... 79
Figure 5-20: Concept diagram of building space index .......................................... 81
Figure 5-21: Building space index of Barkur town .................................................. 81
Figure 5-22: Concept diagram of depth from building entrance index .................... 84
Figure 5-23: Depth from building entrance index of Barkur town .......................... 84
Figure 5-24: Combining axial connectivity, axial link and depth index to predict the popular routes or paths ................................................................. 86
Figure 5-25: Combining axial space, convex space adjacency and axial link index to predict the location of nodes and landmarks ......................................................... 87
Figure 5-26: Land use map of Barkur documented in 2008 .................................. 89
Figure 5-27: Land use map of Udupi from town planning office in 2005 ............... 89
Figure 5-28: Land use map of Basrur documented in 2007 .................................... 90
Figure 5-29: Land use map of Brahmapura documented in 2011 .......................... 90
Figure 5-30: Axial link index of Udupi, Basrur and Brahmapura ............................ 91
Figure 5-31: Convex space adjacency index of Udupi, Basrur and Brahmapura ...... 93
Figure 5-32: Index of depth of Udupi, Basrur and Brahavara 

Figure 5-33: Axial connectivity index of Udupi, Basrur and Brahavara 

Figure 5-34: Axial space index of Udupi, Basrur and Brahavara 

Figure 5-35: Building space index of Udupi, Basrur and Brahavara 

Figure 5-36: Depth from building entrance index of Udupi, Basrur and Brahavara 

Figure 5-37: Conclusion diagram on popular routes for Barkur 

Figure 5-38: Conclusion diagram on popular routes for Basrur 

Figure 5-39: Conclusion diagram on popular routes for Brahavara 

Figure 5-40: Conclusion diagram on popular routes for Udupi 

Figure 5-41: Important nodes for Barkur derived from axial space, convex space adjacency and axial link index 

Figure 5-42: Popular routes and landmarks of Barkur 

Figure 5-43: Popular routes and landmarks of Basrur 

Figure 5-44: Popular routes and landmarks of Brahavara 

Figure 5-45: Popular routes and landmarks of Udupi 

Figure 6-1: Bar Chart showing the profile of people questioned in detailed questionnaire. 

Figure 6-2: Bar chart of the number of people identifying the main roads in each parameter 

Figure 6-3: Map showing conclusions after sketch map analysis in terms of five element of image ability.
Figure 6-4: the five elements of cognition as per Kevin Lynch derived from sketch plan as per age group classification. .............................................................. 139

Figure 6-5: sketch map analysis as per place of residence: within Kacchur old town, within 1km radius beyond Kacchur and beyond 1km radius of the town......................... 140

Figure 6-6: Graph showing places identified by people in daily routine and association in words. ........................................................... 142

Figure 6-7: map showing the intensity of use, association and concern for the town for overall .......................................................... 143

Figure 6-8: the verbal description and association with the places of the town as per age group.............................................................. 144

Figure 6-9: The verbal description and association with the places of the town as per place of residence...................................................... 145

Figure 6-10: % of people identifying each photograph ..................................... 147

Figure 6-11: map showing photos identified most overall............................ 149

Figure 6-12: bar chart showing accuracy and performance in each survey for different age group...................................................... 150

Figure 6-13: bar chart showing performance of people in three surveys as per place of residence.............................................................. 151

Figure 6-14: bar chart showing performance of people in three surveys as per familiarity with the town.............................................................. 151

Figure 6-15: the figures show the operative perception overall comparing first and second and final all five hierarchy ............................................. 157

Figure 6-16: the final operative model of perception of Barkur including all five hierarchies.............................................................. 158

Figure 6-17: responsive model of perception derived from visual impact analysis. 174
Figure 6-18: diagram of final responsive model of Barkur as derived from visual impact analysis ........................................................................................................................................................................... 175

Figure 6-19: Perception of Barkur town in space motion diagram analysis .......... 187

Figure 6-20: conclusion of perception of town in inferential mode .................... 188

Figure 7-1: Elevation of car-street in Barkur ............................................................ 194

Figure 7-2: view and plan of Kalchapra in Barkur ................................................. 194

Figure 7-3: View, plan and section of Panchalingeshwara temple ....................... 195

Figure 7-4: The existing and transformation in Ratha Beedi’s building typology .... 196

Figure 7-5: Residence typology- through the years in Barkur ............................... 197

Figure 7-6: Typical section through the main temple of the town and its surrounding ........................................................................................................................................................................... 198

Figure 7-7: The two views of Panchalingeshwara temple ................................. 199

Figure 7-8: Public institution typology and characteristics ................................. 199

Figure 7-9: Sketch view of the car street ............................................................... 200

Figure 7-10: Map of main spine of Barkur with sequential sketches and change road sections .......................................................................................................................................................................................................................................................... 201

Figure 7-11: plan and photos of key elements in the main street of Barkur .......... 202

Figure 7-12: The typical cross section of Car Street ............................................. 203

Figure 7-13: The verandah as a design element ................................................... 204

Figure 7-14: Plinth in variety of context and possible use ..................................... 204

Figure 7-15: Doorway as a metaphor of welcome or territory or absolute closure.. 205

Figure 10-1: Analysis of response of people to questionnaire in the three parts... 225
