LIST OF FIGURES

Figure 1 (a,b,c) — Illustration of a zero order spectrum and its first and second derivatives.
Figure 2 — Illustration of first derivative zero crossings. Zero crossing of compound is at 264 and 287 nms. These points are used to determine compound A in a mixture of A+B.
Figure 3 — Illustration of second derivative spectra of a compound A.
Figure 4 — Zero, first, second and fourth order derivative spectra of Dothiepin.
Figure 5 — Zero, first, second and fourth order derivative spectra of Amitriptyline.
Figure 6 — Zero, first, second and fourth order derivative spectra of Cyproheptadiene.
Figure 7 — Zero, first, second and fourth order derivative spectra of Imipramine.
Figure 8 — Zero, first, second and fourth order derivative spectra of Trimipramine.
Figure 9 — First derivative spectra of Chlorpromazine, Trifluoperazine and a (1:1) binary mixture of the two compounds.
Figure 10 — First derivative spectra of Chlorpromazine, Thoridazine and a (1:1) binary mixture of the two compounds.
Figure 11 — First derivative spectra of Chlorpromazine, Prochlorperazine and a (1:1) binary mixture of the two compounds.
Figure 12 a — First derivative spectra of Thoridazine and Trifluoperazine.
Figure 12 b — First derivative spectra of 1:1 binary mixture of Thoridazine and Trifluoperazine in varying concentrations.
Figure 13 a — Second derivative spectra of Thoridazine.
Figure 13 b — Second derivative spectra of Trifluoperazine.
Figure 14 a & b — Second derivative spectra of binary mixtures of & Thoridazine and Trifluoperazine.
Figure 15 — Zero order spectra of Chloroquine.
Figure 16 — Zero order spectra of Amodiaquine.
Figure 17 — Zero order spectra of Pyrimethamine.
Figure 18 a,b,c — First, second and fourth derivative spectra of Chloroquine.
Figure 19 a,b,c — First, second and fourth derivative spectra of Amodiaquine.
Figure 20 a,b,c — Zero order absorption spectra of Strychnine, Brucine and a binary mixture of Strychnine and Brucine.
Figure 21 a — First derivative spectra of Strychnine (Solution a) superimposed with first derivative spectra of mixtures of Strychnine and Brucine in various proportions. (Solution A,B,C).
Figure 21 b — First derivative spectra of Brucine (Solution b) superimposed with first derivative spectra of mixtures of Strychnine and Brucine in various proportions. (Solution A,B,C).
Figure 22 a — Second derivative spectra of Strychnine (Solution a) superimposed with second derivative spectra of mixtures of Strychnine and Brucine in various proportions. (Solution A,B).
Figure 22 b — Second derivative spectra of Brucine (Solution b) superimposed with second derivative spectra of mixtures of Strychnine and Brucine in various proportions. (Solution A,B,C).
Fourth derivative spectra of Strychnine (Solution a) and binary mixtures of Strychnine and Brucine in various proportions (Solution A and B).

Fourth derivative spectra of Brucine (Solution b) and mixtures of Strychnine and Brucine in various proportions. (Solutions A and C).

First, second and fourth derivative spectra obtained from an extract of Nuxvomica seeds.

First, second and fourth derivative spectra obtained from viscera spiked with a mixture of Strychnine and Brucine.

Zero order spectra of Aspirin, Paracetamol, Caffeine and a ternary mixture of Aspirin, Paracetamol and Caffeine.

First derivative spectra of Aspirin (Series a), Paracetamol (Series b) and Caffeine (Series c).

First derivative spectra of Aspirin (Series a) and ternary mixtures of Aspirin, Paracetamol and Caffeine.

First derivative spectra of Paracetamol (Series b) and ternary mixtures of Aspirin, Paracetamol and Caffeine (Series A,B,C).

Second derivative spectra of Aspirin (Series a), Paracetamol (Series b) and Caffeine (Series c).

Second derivative spectra of Aspirin, Paracetamol and Caffeine mixtures. (Series A,B,C,D)

Zero order ultraviolet spectra of Heroin, Morphine, Codeine, Papaverine, and narcotic solutions.

Zero order ultraviolet spectra of a Brown sugar solution.

Zero order spectra of Heroin, Diazepam and a binary mixture of Heroin and Diazepam.

Second derivative spectra of Heroin, Diazepam and a binary mixture of Heroin and Diazepam.

Fourth derivative spectra of Heroin, Diazepam and a binary mixture of Heroin and Diazepam.

Zero order spectra of Methaqualone, Heroin and a binary mixture of Methaqualone and Heroin.

Second derivative spectra of Methaqualone, Heroin and a binary mixture of Methaqualone and Heroin.

Fourth derivative spectra of Methaqualone, Heroin and a binary mixture of Methaqualone and Heroin.

H.P.L.C. of Imipramine standard.

H.P.L.C. of Imipramine recovered from different biological tissues along with their controls.

Percentage recovery of Imipramine from various tissues at different time intervals.

H.P.L.C. of Chloroquine recovered from different biological tissues along with their controls.

Percentage recovery of Chloroquine from various tissues at different time intervals.

H.P.L.C. of Strychnine standard.

H.P.L.C. of Strychnine recovered from different biological tissues along with their controls.

Percentage recovery of Strychnine from various tissues at different time intervals.

H.P.L.C. of Paracetamol recovered from different biological tissues along with their controls.

Percentage recovery of Paracetamol from various tissues at different time intervals.

H.P.L.C. of Aspirin recovered from different biological tissues along with their controls.

Percentage recovery of Aspirin from various tissues at different time intervals.

H.P.L.C. of Benzodiazepine standards.

H.P.L.C. of Diazepam recovered from different biological tissues along with their controls.

Percentage recovery of Diazepam from various tissues at different time intervals.

H.P.L.C. of Chlorodiazepoxide recovered from different biological tissues.

Percentage recovery of Chlorodiazepoxide from various tissues at different time intervals.

H.P.L.C. of Nitrazepam and Oxazepam standards.
