ACKNOWLEDGEMENT

I sincerely express my deep sense of gratitude to my honourable Guide, Ex-Director, N.I.O.H., at present Technical Advisor, Gujarat Water and Air Pollution Control Board, who inspite of his busy schedule of work spared his time and guided me towards the successful completion of this work.

I owe a debt of gratitude to Dr. B.B. Chatterjee, Director, N.I.O.H., and Dr. S.K. Kashyap, Dy. Director, N.I.O.H. for providing me the necessary facilities to conduct the present study.

I am grateful to Dr. S.K. Ghosh, Research Officer, Agricultural Health Research Unit, N.I.O.H. for his expert criticism and matured suggestions which helped me in carrying out the work and in writing this thesis as well. I am greatly benefited by his authoritative insight into the microbiological problems.

I am even more indebted to the staff members of A.H.R.U., especially Mr. P.B. Doctor, Miss T.H. Lokhandwala, Miss. A.M. Oza, Mrs. H.S. Trivedi and Mr. R.R. Teli for their technical assistance and constant encouragement.
I shall be failing in my duties if I would not extend my sincere thanks to Mr. C.N. Rawal, Sr. Librarian, N.I.O.H., Dr. Ashok Kothari (U.S.A.), Dr. Jyoti Amin (U.S.A.) and Dr. Apara Dasgupta (Sweden) for providing me the recent literatures.

At the end I wish to acknowledge my sincere thanks to Mr. P.A. Thomas and Mr. Talsania for their secretarial assistance.

V.N. Gokani
