ACKNOWLEDGEMENT

The author takes this opportunity to express his profound gratitude and deep regards to his supervisors, Dr. R.K. Swain and Dr. S.K. Acharya for their valuable suggestions, exemplary guidance, monitoring and constant encouragements throughout the course of this dissertation work. The author wishes to express thanks to Mr. Manas Ranja Giri and Mr.K.C Mohapatra for their assistance at various stages of the experiments. The author wishes to express his profound gratitude to his wife, Mama, daughter Juli and son Raja for maintaining the necessary atmosphere of understanding and providing the encouragement and support in spite of being in the midst of hardships. The author wishes to express his profound gratitude to his parents and parents in laws for understanding the difficulty and supporting. The Author wishes to thank Prof. D.N. Thatoi (HOD Mechanical Engineering Department), ITER, Bhubaneswar for their support in my work. Finally, the author is grateful to all his well wishers and other concerned persons who helped him directly or indirectly to complete the present work.

I owe my deepest gratitude and prayer to the God, Almighty for giving me the power and blessings for completing the work.
