ACKNOWLEDGEMENTS

I take great pleasure in recording my deep appreciation and grateful thanks to Dr. H.C. Srivastava, Head of the Chemistry and Chemical Technology Division, Ahmedabad Textile Industry's Research Association (ATIRA), for his unfailing interest, kind guidance and encouragement during the entire period of this work.

I am deeply indebted to Dr. P.C. Mehta, Director of ATIRA, and to Dr. T.S. Subramanian, former Director of ATIRA, for permitting me to carry out this work in ATIRA and for their keen interest in it.

My grateful thanks are due to Dr. G.A. Adams, Division of Biosciences, National Research Council, Ottawa, Canada, and to Dr. J.L. Bose, National Chemical Laboratory, Poona, India, for the sedimentation and electrophoretic analyses of the polysaccharide respectively.

I am thankful to Messrs. M. Ratnaprabhu, G.C. Ghosh, D.S. Pai, G.G. Kulkarni and M.C. Paliwal. But for their hospitality, the stay at ATIRA would have been impossible.

I am grateful to all my colleagues, especially to Messrs. S.N. Harshe, R.S. Farmar, A.S. Divatia, D. Ramakrishnan and Dr. J.S. Rao for their kind help and co-operation.

Award of a Junior Research Fellowship from the Council of Scientific and Industrial Research (India) is gratefully acknowledged.
