APPENDIX-8

Instruction for the teacher

Dear students.

Today you are going to give a test, which contains some simple mathematical calculations. By this test you can know that how comfortable and fast you are with mathematical calculations.

Now, you have to strictly follow the instructions that are given to you while appearing in the test and consciously utilize the time period given to you.

Now, first I will distribute the answer sheet. (Teacher will show the answer sheet) Instructions are written on one side and you have to tick mark the answers on the other side.

Start reading the instructions one by one and try to understand them thoroughly. (Teacher has to wait for 3 minutes.)

Did you understand how to mark the answers?

Now, fill up the details asked in the table (name, gender, school name, etc.) with pen/pencil.

Now I will distribute the question booklet that has 40 questions. You have 40 minutes time period. So don’t waste time and GET READY. Don’t open the booklet unless I instruct you. (Instructor will distribute the question booklet in the class)
Now start attempting. (Instructor will start the stopwatch and do the supervision. When 40 minutes get over instruct the students.)

Now stop writing. Put your pen/pencil down. Cover your answer sheet with question booklet and return me. (Instructor will collect the answer sheets and question booklets from each student.)
