ACKNOWLEDGMENT

This Thesis is to fulfill the requirement of earning a Ph.D. Degree of Gujarat University. Thanks to The University Grants Commission who has awarded me a Junior (Merit) Fellowship for such Research work.

Man is the most important link between the blue-print and transformation of blue-print into reality. To that effect I owe a lot, to many persons without whose help and guidance I could not have accomplished this work.

To begin with I acknowledge deep sense of gratitude and indebtedness to Prof. Pulin K. Garg of IIM, whose guidance and encouragement have been instrumental in bringing out this thesis.

Prof. Dr. Paresh Majmudar and Dr. Arvindrai N. Desai need my full-throat appreciation for their inspiration in taking up the fellowship, selecting the topic of the research work and doing all spade work for preparing the frame work and cohesive skeleton.

Prof. Murthy of Physical Research Laboratory who took lot of pains in the processing of my data collection at their Computer Centre, and my thanks are also due to him.

I express my gratitude to Dr. G. R. Desai, Actuary & Statistician, Dr. A. V. Gajjar, Reader in Statistics of Gujarat University and Dr. P. B. Desai, Ex-Director, Institute of Economic Growth, Delhi for their valuable suggestions on the presentation of the whole work.

I especially wish to express my gratitude to my parents and wife who have constantly encouraged me to take up and fulfil this work.

Last but not the least my thanks go to the numerous Supervisors and Non-Supervisors of Six Textile Mills of Ahmedabad for their response to my questionnaire without whose co-operation this study could not have been conducted and completed.

SANJAY NAIK
