5.3.2.5 Satellite data analysis and generation of LAI maps
5.3.3 Results and discussion
5.3.3.1 Variability in LAI and atmospheric measurements across sites
5.3.3.2 Relationship between vegetation index and field-based LAI
5.3.3.3 Validation of MODIS LAI products
5.3.3.4 Issues associated with validation of MODIS LAI
5.3.4 Conclusions

6 UNDERSTANDING THE LAND SURFACE PROCESSES USING THE LAND SURFACE PARAMETERS AND A PHYSICAL MODEL

6.1 Introduction
6.2 Data and Methodology
  6.2.1 Description of Land Surface Model (LSM)
  6.2.2 Study site and Land Surface Process Experiment (LASPEX)
  6.2.3 Surface inputs of LSM
  6.2.4 Parameterization of atmosphere forcing variables
  6.2.5 Numerical simulations of surface fluxes over a crop site
  6.2.6 Estimation of NPP from satellite data and LSM
  6.2.7 Numerical simulations of surface fluxes as a function of LAI
6.3 Results and discussion
  6.3.1 Fluxes from LSM and its comparison with LASPEX observations
  6.3.2 Comparison between NPP derived from LSM and satellite data
  6.3.3 Impact of LAI on the land surface processes
6.4 Conclusions

7 SUMMARY, MAJOR CONCLUSIONS AND FUTURE SCOPE

7.1 Summary and major conclusions of the thesis
7.2 Scientific contribution of the study
7.3 Future scope of research
