ACKNOWLEDGEMENTS

God gives blessings to us so we can give glory to him. I'm blessed and I thank God for everything in my life.

I deem it my privilege and honour to place and record my gratitude and indebtedness to the following without whose support, guidance, and concern I would not have been able to complete my Ph. D thesis.

I feel privileged to express my deep sense of reverence and gratitude to my revered mentor, Dr. Tiratha Raj Singh, for his support, immaculate guidance, constructive criticism, constant encouragement and providing requisite facilities to carry on my research which otherwise would have remained incomplete. His nurturing and caring concern has been a stimulus which I will always cherish. I also appreciate his untiring efforts during the entire tenure of my research work and patience during writing of this thesis. I have no words to express my gratitude for everything he has contributed in my Ph. D and without his blessings it was surely impossible for me to finish my work. I thank him from bottom of my heart.

I emphatically express my loyal and venerable thanks to Prof. Shiban Kishen Kak (Vice Chancellor, JUIT), Brig. (Retd.) Balbir Singh (Director, JUIT), Prof. T. S.Lamba (Dean, JUIT) and Dr. Y. Medury (Ex-COO, Jaypee Education System) for providing opportunity to pursue a Doctorate Degree, teaching assistantship and advanced lab infrastructure to accomplish this scientific venture of my life.

I gratefully acknowledge the help rendered by Prof. R. S. Chauhan (Dean, BT and HOD, Dept. of BT& BI) for his encouragement, timely help and cooperation throughout my research work. It gives me immense pleasure to express my gratitude to Chauhan Sir for his ever smiling disposition coming to my rescue in solving my problems and suggestions which helped me in maintaining my confidence.

I also feel indebted to my all time advisor, Mr. Sudipta Ku. Das (Lect. in dept. of Zoology, P.S. College, gaisilat, Odissa), Dr. Ragini Raj Singh (Assist. Prof. Dept. of Physics and Material Science, JUIT), and Dr. Anupriya Kaur (Assist. Prof., Dept. of Humanities and Social Science, JUIT) for their valuable advice, unconditional support and guidance.

This document would have remained an infant had it not received its necessary 'diet’ in the form of comments, suggestions etc. by Dr. C. Rout, Dr. J. Ramana, Dr. Udayabanu M., Dr. Pradeep Kumar Naik, and Dr. Hemant Sood. I am short of words in expressing my thanks to them, for their innovative ideas that shaped this document.

I wish to convey my sincere thanks to all the faculty members of Department of
Biotechnology and Bioinformatics, for their help and guidance at the various stages of this study. I am also thankful to all the members of technical and non-technical staff of the department for their assistance and valuable contributions.

I am fortunate to have friends who have always stood beside me. I extend my heartfelt thanks to Jatin Sir, Varun Sir, Krishna Sir, Bharti Ma’am, Archit, Nikhil, Manika, Ashwani, Tarun, Ankita, Tamanna, Pawan, Dikshita and Deepika for their sustained support and ever needed cooperation. I also thank Asha, Pallavi, Nidhi, Dibyajyoti, and Yamini for their inspiration throughout my life.

It is my pleasure to express my gratitude to all research scholars of the Biotechnology & Bioinformatics Department for keeping me blessed with best wishes. It is worthwhile expressing my gratitude to Dr. Ahmed Moussa, Dr. Moacyr Comar Junior, and Mr. Ramit Singla who provided me assistance and valuable contributions.

The successful culmination of this thesis could not have been possible without Dr. Kamal Raj Pardasani (Professor, Department of Mathematics, Maulana Azad National Institute of Technology, Bhopal, India) and Dr. Brigitte Vannier (Assistant professor of cell biology, University of Poitiers, Poitiers, France). Their critical review and constructive and insightful comments were very helpful in strengthening this Thesis.

The purpose of this acknowledgement will be incomplete if I fail to appreciate the moral support and encouragement rendered by my family and my loving husband, Preetam Biswal (he is also one of my greatest advisor). I would like to express my love to my sweet nephew “Aryaveer Nayak” whose innocence refreshed me during my difficult times. The successful culmination of this thesis could not have been possible without the blessings of my loving parents and Inlaws. Without their help I would have been greatly incapacitated.

All may not be mentioned, but no one is forgotten.

Priya Pradayani Panigrahi
