LIST OF TABLES

1. Compendial Standards of Drugs. 27
2. Standardization Parameters 40
3. Standard Curves:
   3.1 Ampicillin trihydrate 44
   3.2 Chlorpropamide 44
   3.3 Prednisolone 45
3(a) Coding & Composition of Solid Dispensions 46
4. Dissolution Profile:
   4.1 Ampicillin trihydrate - Solid Dispersions
      4.11 Solvent Method 55
      4.12 Melting Solvent Method 55
   4.2 Chlorpropamide - Solid Dispersions
      4.21 Solvent Method 56
      4.22 Melting Method 56
   4.3 Prednisolone - Solid Dispersions
      4.31 Solvent Method 56
      4.32 Melting Solvent Method 56
5. Percent Dissolution:
   5.1 Ampicillin trihydrate - Solid Dispersions
      5.11 Solvent Method 69
      5.12 Melting Solvent Method 69
   5.2 Chlorpropamide - Solid Dispersion
      5.21 Solvent Method 69
      5.22 Melting Solvent Method 69
   5.3 Prednisolone - Sold Dispersions
      5.31 Solvent Method 69
      5.32 Melting Solvent Method 69
6. Log percent to be released data:
   6.1 Ampicillin trihydrate - Solid Dispersions
      6.11 Solvent Method 70
      6.12 Melting Solvent Method 70
   6.2 Chlorpropamide - Solid Dispersions
      6.21 Solvent Method 70
      6.22 Melting Solvent Method 70
   6.3 Prednisolone - Sold Dispersions
      6.31 Solvent Method 70
      6.32 Melting Solvent Method 70
7. ANOVA test tables
   7.1 Drug release with different percentages of carrier. 71
   7.2 Drug release with different carriers. 71
   7.3 Drug release with different methods of preparation. 71
   7.4 Model calculation procedure for F-test 71
8. Proportionality constants for Higuchi's plot 71
9. Linear regression analysis 72
10. Plasma level of drugs & selected solid dispersions 72
11. Dissolution rate constants:
   11.1 Ampicillin trihydrate - Solid Dispersions 72
       11.11 Solvent Method 72
       11.12 Melting Solvent Method 72
   11.2 Chlorpropamide - Solid Dispersions 72
       11.21 Solvent Method 72
       11.22 Melting Solvent Method 72
   11.3 Prednisolone - Solid Dispersions 72
       11.31 Solvent Method 72
       11.32 Melting Solvent Method 72
12. Infra red spectral data 73
