ACKNOWLEDGEMENTS

I am greatly indebted to Dr. S. R. Sivaraja Iyer, Head, Physical Chemistry Section, Ahmedabad Textile Industry's Research Association, (1964-1966), presently Professor of Physical Chemistry and Head, Chemistry Section, University Department of Chemical Technology, Bombay, for his constant encouragement, able guidance, and long hours of discussions throughout the course of these investigations.

I also wish to express my sincere gratitude to Dr. G. Srinivasan, Hindustan Lever Research Centre, Bombay, with whom, I had had several useful and purposeful discussions.

I am thankful to my colleagues in ATIRA, particularly Dr. N. T. Baddi, Mr. L. S. Rao and Mr. D. Ramakrishnan, who helped me at various stages of this work. I wish to thank Dr. B. I. Nemade, of the U.D.C.T., Bombay 19, who helped me in some of these studies.

I am grateful to the authorities of ATIRA for providing me with all the facilities to pursue these studies in ATIRA.

Support from the United States Department of Agriculture, under PL-480, through an award of a Research Fellowship is gratefully acknowledged.

Finally, I am very much thankful to some of the families in ATIRA colony, who through their warm hospitality and friendship made my stay at ATIRA pleasant and memorable.
