## CHAPTER 1

| 1.1 Introduction                              | 4    |
| 1.2 Literature Survey                         | 5    |

## CHAPTER 2

| 2.1 Introduction                              | 19   |
| 2.2 Transformation and arbitrary reference frame | 34   |
| 2.3 Current source Inverter Fed Induction Motor and its Overall Configuration | 39   |
| 2.4 Analytical Model of Current Source Inverter Fed Induction Motor Referred to d-q Reference Frame | 43   |
| 2.5 State Space Model of CSIFIMDS In d-q Reference Frame | 56   |
| 2.6 Per Unit Representation of the Mathematical Model of the System | 66   |
| 2.7 Determination of the Quiescent or Equilibrium States | 69   |
| 2.8 Summary                                   | 73   |

## CHAPTER 3

| 3.1 Introduction                              | 74   |
3.2 Current Source Inverter (Conventional)
3.3 Commutation Process In The Conventional Current Source Inverter
3.4 Voltage Ratings of Conventional CSI Components
  3.4.1 Capacitor Voltage Variation
  3.4.2 Voltage Across Thyristor
  3.4.3 Voltage Across Diode
  3.4.4 Maximum and Minimum Value of Capacitor Voltage
3.5 Control Strategy For Slip Regulated Induction Motor Speed Control
3.6 Closed Loop Control Strategy For Four Quadrant Operation
  3.6.1 Converter Control Circuit
  3.6.2 Inverter Control Circuit
  3.6.3 Slip Regulator SR
  3.6.4 Current Controller
  3.6.5 Starting The CSI
  3.6.6 Starting Circuit For CSI
5.3.2 Equivalent circuit

5.3.3 Small Signal Equivalent Circuit Equations

5.4 Linear Stability Analysis Of A Rectifier-Inverter Fed Induction-Motor Drive System

5.4.1 Basic D-Q Model Equations Of An Induction Motor

5.4.2 Development of The Linearised Matrix Equations

5.5 Stability Studies

5.6 Non-Linear Stability Studies

5.6.1 Stability Analysis

5.6.2 Chetaev Method

5.6.3 Krasovskii Method

5.6.4 Zobov Method

5.6.5 Aizerman's, Lure's, and Popov's Methods

5.7 Liapunov Stability Theory

5.7.1Lasalle's Theorem

5.7.2 Summary
### 5.8 Salient Computational Problems And Their Solutions

#### 5.8.1 Generation Of Positive Definite Matrices ($Q$)

#### 5.8.2 Solution Of Matrix Liapunov Equation

#### 5.8.3 A Directed Random Search Technique For The Minimum Problem

#### 5.8.4 Procedure

#### 5.8.5 Bisection Search

#### 5.8.6 Solution Of The Maximum Problem

#### 5.9 Summary

#### 5.10 Efficacy Of The Algorithm Vis-a-Vis Dote's Algorithm For The Estimation Of The Domain Attraction

### 6.1 Introduction

#### 6.1.1 Conclusions

#### 6.2 Results

#### 6.3 Future Scope Of Work

#### 6.4 Summary
