Acknowledgments

The research that has gone into this thesis has been thoroughly enjoyable. That enjoyment is largely a result of the interaction that I have had with my supervisor, and colleagues. I feel very privileged to have worked with my supervisor, Dr. V. P. Jagathy Raj. To him I owe a great debt of gratitude for his patience, inspiration and friendship. Dr. V. P. Jagathy Raj has taught me a great deal about the field of maintenance engineering by sharing with me the joy of discovery and investigation that is the heart of research.

I would also like to thank Dr. S. R. Devadasan, Professor, Department of Production Engineering, P.G. College of Technology, Coimbatore, Tamil Nadu State, India, who supervised my initial research and helped me through out the period of my research work. Through him I made the attempts to locate the area of research.

The School of Engineering and School of management studies has provided an excellent environment for my research. I spent many enjoyable hours with department members and fellow students. Without this rich environment I doubt that many of my ideas would have come to fruition.

I am extremely grateful to Professor. G. Madhavan Nair, Lecturer, Department of English, Amrita Visva Vidya Peetham, Kollam, Kerala State, India, Dr. P. T. Rajan Nambiar, Former Principal, School of Engineering, Cochin University of science and technology, Kochi, Kerala State, India, Professor C. K. Ramaswamy, Lecturer, Chinnaya Mission College, Palakkad, Kerala state, India, and Professor K. P. Gopinatha Pillai, Retired Professor, Bishop Moore College, Mavelikara, Kerala state, India who spent their valuable time to correct the linguistic errors and grammatical mistakes, which resulted in the improvement of the standard of English language used in this thesis.

I am extremely thankful to the anonymous referees of the papers published based on this research, Professor A. Gunasekran, editor of "International Journal of services and operations management, Professor Pervaiz K. Ahmed, editor of "International Journal of Management Practice", Dr. David Galleur, U K, editor, International Journal of Process Management and Benchmarking, and Professor Saleh O Douffoua, Editor, Journal of quality in Maintenance Engineering and several anonymous referees whose comments and remarks enabled us to improve the presentation quality of the research to a significant extent. We are grateful to all the respondents of the surveys reported in this thesis.

Thanks are also due to my family who has been extremely understanding and supportive of my studies. I feel very lucky to have a family that shares my enthusiasm for academic pursuits.

Finally I'd like to thank my Father, Prof. G. Ramakrishna Panicker, and my mother Mrs. K. G. Santhakumari Amma for encouraging me so much over the years.

Pramod V. R.
