ACKNOWLEDGEMENT

First and foremost I want to thank my advisor Dr. M.V. Vijayakumar. It has been an honour to be his first Ph.D. student. Coming from Department Electrical & Electronics Engineering and getting Ph.D. from department of Computer Science & Engineering, the journey was smooth, time-memorial and joyful, which was impossible without my guide blessing. The joy and enthusiasm he has toward research was contagious and motivational for me, even during tough times in the Ph.D. pursuit.

My greatest gratitude goes to my student & friend Rohit Kumar (RK), who stood beside me in all my ups and downs, of my thesis and guide me in reaching this stage and also my other eight students who provide me my moral strength.

My particular thanks goes to my colleagues Lithesh, Inbasakaran and Mohan at NHCE for the constant support given by them, which meant a lot.

Special thanks go to Nidhi Agarwal who guided my thesis to acquired an ‘English Shape” to my thesis.

I would not forget my childhood friend Gurudutt, for is timely help and confidence support he provided me when mattered.

The overall success of this thesis depends largely on the encouragement and guidelines of many directly or indirectly. I would take this opportunity to express my gratitude to all the people who have been instrumental in helping me in completion of this Thesis.

I would like to gratefully acknowledge the Karnataka Renewable Energy Development Limited (KREDL), a nodal agency by the ministry of non conventional energy resources Govt. of India for providing the wind data resource assessment and also acknowledge New Horizon College of Engineering for constant support.

Finally, my deepest gratitude goes to my family especially my Mom and my Bro (Suresh) to keeping in belief & faith on me, providing unconditional support throughout my life and studies.
