# CONTENTS

**CHAPTER 1- INTRODUCTION**

1.1. Environmental pollution  
1.2. Classification of pollution  
   1.2.1. Air pollution  
   1.2.2. Soil pollution  
   1.2.3. Thermal pollution  
   1.2.4. Water pollution  
      1.2.4.1. Sources of water pollution  
      1.2.4.2. Effects of water pollution  
1.3. Classification of water pollutants  
   1.3.1. Organic pollutants  
   1.3.2. Inorganic pollutants  
   1.3.3. Suspended solids and sediments  
   1.3.4. Radioactive substances  
1.4. Heavy metal pollution  
   1.4.1. Effects of heavy metals on human health  
   1.4.2. Biochemistry of metal toxicity  
1.5. Heavy metal removal techniques  
   1.5.1. Chemical precipitation  
   1.5.2. Ion exchange  
   1.5.3. Membrane filtration  
      1.5.3.1. Ultra filtration  
      1.5.3.2. Reverse osmosis  
      1.5.3.3. Nano filtration  
      1.5.3.4. Electrodialysis  
   1.5.4. Coagulation and flocculation  
   1.5.5. Adsorption  
      1.5.5.1. Factors affecting adsorption of metal ions  
1.6. Types of adsorbents  
   1.6.1. Activated carbon  
   1.6.2. Clays  
   1.6.3. Minerals  
   1.6.4. Low cost adsorbents  
      1.6.4.1. Agricultural wastes  
      1.6.4.2. Industrial wastes  
1.7. Survey of literature

CHAPTER 2- ADSORPTION STUDIES OF Pb (II) ON ARJUN TREE FRUIT (TERMINALIA ARJUNA)

2.1. Introduction 53
2.2. Materials and methods 55
   2.2.1. Preparation of adsorbent 55
   2.2.2. Chemicals and reagents 55
   2.2.3. Characterization of adsorbent 55
   2.2.4. Batch adsorption studies 56
      2.2.4.1. Effect of contact time 56
      2.2.4.2. Effect of pH 56
      2.2.4.3. Point of zero charge 57
      2.2.4.4. Effect of adsorbent dose 57
   2.2.5. Breakthrough studies 58
   2.2.6. Desorption studies 58
2.3. Results and discussions 59
   2.3.1. Characterization of adsorbent 61
   2.3.2. Effect of initial Pb (II) concentration and contact time 66
   2.3.3. Effect of pH 69
   2.3.4. Effect of adsorbent dose 72
   2.3.5. Adsorption isotherms 74
   2.3.6. Adsorption thermodynamics 80
   2.3.7. Adsorption kinetics 82
   2.3.8. Breakthrough capacity 88
   2.3.9. Desorption studies 88
2.4. Conclusions 90
