ACKNOWLEDGEMENTS

Many people and organizations have directly or indirectly contributed to the research process that has culminated in this thesis. Without their support, encouragement, ideas, and constructive criticism, I would not have been able to complete this process with the required thoroughness and creativity.

As I look back on the journey of writing this dissertation, I am reminded of my own smallness. So it is with the most genuine gratitude that I wish to acknowledge the encouragement of friends, family, and colleagues – all of you who have taken an interest in my project and whom I know now will share the joy of its completion.

Special thanks goes to my research guides Dr. Valeed A. Ansari and Dr. Ahsan Jamil. Thank you Valeed Sir for granting me the freedom to follow my own heart but challenging me to reach even further when I would have settled for less, your never-ceasing encouragement and dedication have meant so much to me. Ahsan Sir, your frank response sharpened my arguments and tightened my line of reasoning for which I am indebted.

Last but not least, the greatest thanks go to my family, who has uncomplainingly spared me for this visionary project.

Thank you, Almighty God, for granting me strength and wisdom to complete this study.

Ahmar Uddin Mohd.
