# List of Tables

Table 1: Recommended dietary allowances (RDA) for selected nutrients during adolescence ................................................................. 17

Table 2: Recommended dietary allowances for adolescents .................................................................................................................. 18

Table 3: Body Mass Index ................................................................................................................................................................. 71

Table 4: Statistical tests used and their purposes ............................................................................................................................. 75

Table 5: Distribution of adolescents according to sex, age, education and addiction .............................................................. 82

Table 6: Distribution of adolescents according to religion, caste, and residence ........................................................................ 83

Table 7: Distribution of adolescents according to family type, members and income ............................................................. 85

Table 8: Distribution of adolescents according to age of fathers and mothers ........................................................................ 86

Table 9: Distribution of adolescents according to education of fathers and mothers ............................................................... 87

Table 10: Distribution of adolescents according to occupation of fathers and mothers ........................................................ 88

Table 11: Distribution of adolescents according to sex and weight ............................................................................................. 89

Table 12: Distribution of adolescents according to sex and height ............................................................................................. 90

Table 13: Distribution of adolescents according to sex and body mass index ............................................................................ 91

Table 14: Distribution of healthy and diseased adolescents according to sex ........................................................................ 92

Table 15: Distribution of healthy and diseased adolescents according to family income ....................................................... 93

Table 16: Distribution of healthy and diseased adolescents according to food habit .............................................................. 94

Table 17: Distribution of healthy and diseased adolescents according to regularity in meals .................................................... 95

Table 18: Distribution of healthy and diseased adolescents according to liked food ............................................................ 96

Table 19: Distribution of healthy and diseased adolescents according to skip meal ............................................................................. 96

Table 20: Distribution of healthy and diseased adolescents according to food liked made at home/market ...................................................... 97

Table 21: Distribution of healthy and diseased adolescents according to addiction .............................................................. 99

Table 22: Distribution of healthy and diseased adolescents according to sleeping hours .................................................. 100

Table 23: Distribution of healthy and diseased adolescents according to hobbies .............................................................. 101

Table 24: Distribution of healthy and diseased adolescents according to type of cloth ........................................................ 102
Table 25: Distribution of healthy and diseased adolescents according to party accompanied with ................................................................. 102

Table 26: Distribution of healthy and diseased adolescents according to type of friends liked ........................................................................... 104

Table 27: Distribution of healthy and diseased adolescents according to interaction ................................................................. 105

Table 28: Distribution of healthy and diseased adolescents according to boldness ................................................................. 106

Table 29: Distribution of healthy and diseased adolescents according to face the problems ................................................................. 107

Table 30: Distribution of healthy and diseased adolescents according to figure consciousness ................................................................. 108

Table 31: Distribution of healthy and diseased adolescents according to type of work ........................................................................... 109

Table 32: Distribution of healthy and diseased adolescents according to mode of transport ................................................................. 109

Table 33: Distribution of healthy and diseased adolescents according to stress ........................................................................... 110

Table 34: Mean scores of mental health among the male and female adolescents ........................................................................... 111

Table 35: Mean scores of various mental health among the healthy and diseased adolescents ................................................................. 112

Table 36: Mean intake of nutrient among male and female adolescents ........................................................................... 114

Table 37: Mean intake of nutrient among healthy and diseased adolescents ........................................................................... 115

Table 38: Correlation between body mass index with mental health among male adolescents ................................................................. 116

Table 39: Correlation between body mass index with mental health among female adolescents ................................................................. 117

Table 40: Correlation between body mass index with nutrient intake among male adolescents ................................................................. 118

Table 41: Correlation between body mass index with nutrient intake among female adolescents ................................................................. 119
