ACKNOWLEDGEMENTS

Research in the area of health psychology, particularly in the domain of cardiovascular disease is a fascinating and stimulating experience. I am eternally indebted to my esteemed supervisor Prof. Akbar Husain who, despite busy academic schedules, spared time to supervise my highly demanding research work. I admit that the conception and culmination of the research work was due to the high professional quality of supervision and inspiration I received from him.

Similarly, I would like to gratefully acknowledge to my worthy Co-supervisor Dr. M. Urooj Rabbani whose thought-provoking suggestions, and well-developed professional skill and expertise in the field of cardiology enabled me to reach a standard sufficient knowledge in cardiovascular diseases. I must confess that his distinction and experience in the field of cardiovascular disorders was instrumental in the development of tools.

I wish to thank Prof. P.R. Gupta, Chairman, Department of Cardiology, Institute of Medical Sciences, B.H.U., Varanasi for their professional opinion and allowing me to contact heart patients and hypertensive patients in the O.P.D. My warmest thanks are also due to all the patients who patiently and unhesitatingly filled the questionnaires.

I thankfully appreciate the support and encouragement received from Prof. S.P. Gupta, Dean, Faculty of Social Sciences, Prof. Saeeduzzafar, Chairman, Department of Psychology, and other teachers of the Department Prof. Qamar Hasan and Prof. (Mrs.) Hamida Ahmad and Prof. Shamim A. Ansari as well as the Office, Laboratory and Library Staff of the Department of Psychology.
I am immensely appreciate of library facilities extended to me by the librarians Prof. Noorul Hasan Khan, Maulana Azad Library and Mr. Shamshad Ahmad of J.N. Medical College Library, A.M.U., Aligarh, Library Staff of National Medical Library, All India Institute of Medical Sciences and WHO regional Office, New Delhi also deserves appreciation.

I wish to express my thanks to Dr.(Mrs.) Zulfla Khan, Chairman, Department of Community Medicine, J.N. Medical College, and Mr. Afzal Ahmad, Section Officer, Faculty of Social Sciences, A.M.U., Aligarh for the cooperation and understanding they demonstrated during the Ph.D. course.

I wish to place on record my deep sense of gratitude to my parents, sister Raghda and brothers - Sahir & Jadulallah other family members.

Many thanks to my friends - Abduallah Jamil, Ayman Shadid, Mustafa-al-Sheikh, Iyad-al-Ali, Mustafa-al-Laham, Hikmat-al-Alawni, Sameer-al-Dairaway, Amjad Abu Marouf, Mahir-al-Otaibi, Mansour Gatasheh, Sahel-al-Rosan, and Ahmad Asaf; Sheikh Abdul Barakat, S.M. Ashraf Imam, Shaukat Ahmad Shah, Manzoor Ahmad Sheikh, and Daud Salim Farooqui for their constant support and encouragement in time of need and for cheerfully accepting my preoccupation all these years.

Last but not the least, I wish to thank to Mr. Bobby for typing the manuscript.

Wael Mustafa Fayez Mahmoud
