List of Tables

Table 1: Microarray studies on gastric cancer
Table 2: Mass spectrometric studies on gastric cancer
Table 3: Details of patient samples used for microarray analysis
Table 4: A list of antibodies used in this study
Table 5: A partial list of upregulated genes previously reported in gastric adenocarcinoma
Table 6: A partial list of novel genes upregulated in gastric adenocarcinoma
Table 7: A partial list of overexpressed proteins previously reported in gastric cancer
Table 8: A partial list of novel proteins overexpressed in gastric adenocarcinoma

Appendix I

Table 1: List of genes upregulated in gastric adenocarcinoma by gene expression analysis using DNA microarrays

Table 2: List of genes downregulated in gastric adenocarcinoma by gene expression analysis using DNA microarrays

Appendix II

Table 1: List of proteins overexpressed in gastric cancer secretome by mass spectrometric analysis

Table 2: List of proteins downregulated in gastric cancer secretome by mass spectrometric analysis

Appendix III

Table 1: Characteristics of tumor cell lines used in this study
