List of Figures

Figure 1: Anatomy of the stomach
Figure 2: Incidence and mortality rates of the top ten cancers
Figure 3: Worldwide incidence and mortality rates of gastric cancer
Figure 4: Nationwide incidence and mortality rates of gastric cancer in males and females
Figure 5: Histological progression of intestinal type gastric adenocarcinoma
Figure 6: Histological image showing signet ring cell gastric carcinoma
Figure 7: Schematic workflow of microarray analysis
Figure 8: Volcano plot representing the statistically genes identified by microarray
Figure 9: Screenshot of the GEO record for the microarray data submitted from this study
Figure 10: Heat map of differentially expressed genes
Figure 11: Gene Set Enrichment analysis of differentially expressed genes
Figure 12: Biological network analysis of upregulated genes in gastric adenocarcinoma
Figure 13: Immunohistochemical staining of Villin-1 in normal gastric tissue and gastric tumors
Figure 14: Immunohistochemical staining of SPOCK 1/ Testican-1 in normal gastric tissue and gastric tumors
Figure 15: Schematic workflow of proteomic analysis of secreted proteins using gastric cancer cell lines
Figure 16: Biological network analysis of aberrantly secreted proteins in gastric adenocarcinoma
Figure 17: Venn diagram showing the proteins identified in common to gastric cancer secretome and other body fluids
Figure 18: MS and MS/MS spectra of a subset of candidates found to be overexpressed in gastric cancer by mass spectrometry-based proteomic analysis
Figure 19: Immunohistochemical staining of PCSK9 in normal gastric tissue and gastric tumors
Figure 20: Immunohistochemical staining of LMAN2 in normal gastric tissue and gastric tumors
Figure 21: Immunohistochemical staining of PDAP1 in normal gastric tissue and gastric tumors
