Child Labour in India*
Hands that have to hold books and pencils are holding spanners and screwdrivers!
Employed as petty labourers
Hoping for a miracle..

They may never experience the beautiful side of their childhood!
Children of today, citizens of tomorrow still remains a dream!
We do need engineers, but not by compromising their education!
Every child we hire is like killing the lawyer, doctor, engineer, or a socialist in him!
The photo says it all!
