</table>
Table 3.6 Density (number of individuals/ha) of different tree species in different oak patches of Nainital district.

Table 3.7 Density (numbers of individuals/ha) of different Tree species at all the surveyed sites of Almora district of Kumaon Himalayas.

Table 3.8 Density (numbers of individuals/ha) of different trees species at all the surveyed sites of Pithoragarh District.

Table 3.9 Abundance of regenerating tree species at different sites in Kumaon Himalayas.

Table 3.10 Values of Pearson product moment correlation coefficients between different habitat attributes.

Table 3.11 Principle Component Analysis of the habitat variable showing component loading on three principle components.

Table 3.12 Principal Component Analysis of all the surveyed sites in habitat variable space showing component loading.

Table 4.1 Direct and indirect evidences of different ungulate species recorded at surveyed sites in Kumaon Himalaya.

Table 4.2 Mean pellet group density (pellet groups/ha ± S.E.) of different ungulate species at surveyed sites in Kumaon Himalayas.

Table 4.3 List of variables used in discriminant function analysis.

Table 4.4 Values of Wilks' Lambda and univariate F ratios for variables used in DFA (3 & 256 degree of freedom).
Table 4.5 Standardised canonical discriminant function coefficient for 6 variables from a discriminant function analysis of four ungulate species.

Table 5.1 Encounter rates (groups/km±SD) of barking deer on different trails in different seasons in Binsar Wildlife Sanctuary.

Table 5.2 Encounter rates (groups/km) of the goral on different trails in different seasons in Binsar Wildlife Sanctuary.

Table 5.3 Mean pellet group density (pellet groups/ha±SD) of barking deer in different seasons on different transacts in Binsar Wildlife Sanctuary.

Table 5.4 Mean pellet group density (pellet groups/ha±SD) of goral in different seasons on different transacts in Binsar Wildlife Sanctuary.

Table 5.5 Mean density (individuals/km²) of barking deer and goral in different seasons in Binsar Wildlife Sanctuary.

Table 5.6 Percentage of groups of barking deer in different group size category in different seasons in Binsar Wildlife Sanctuary.

Table 5.7 Percentage of groups of goral in different group size category in different seasons in Binsar Wildlife Sanctuary.

Table 5.8 Mean group size±SD of barking deer on different trails in different seasons in Binsar Wildlife Sanctuary.

Table 5.9 Mean group size±SD of goral on different trails in different seasons in Binsar Wildlife Sanctuary.
seasons in Binsar Wildlife Sanctuary.

Table 5.10 Age and sex composition of barking deer and goral in Binsar Wildlife Sanctuary. n= total number of individuals classified

Table 5.11 Sex ratio (adult male:100 female) in barking deer and goral in Binsar Wildlife Sanctuary.

Table 6.1 Principal component analysis of direct sighting data of barking deer during pre-monsoon season in Binsar.

Table 6.2 Principal component analysis of direct sighting data of Barking deer during post-monsoon season in Binsar.

Table 6.3 Principal component analysis of direct sighting data of Goral during pre-monsoon season in Binsar.

Table 6.4 Principal component analysis of direct sighting data of goral during post-monsoon season in Binsar.

Table 6.5 Mean values of habitat variables between available and utilised plots during pre monsoon and post monsoon season for barking deer in Binsar.

Table 6.6 Mean values of habitat variables between available and utilised plots during pre monsoon and post monsoon season for goral in Binsar.

Table 6.7 Correlations between pellet group density of barking deer and goral with habitat variables during pre-monsoon and post-monsoon seasons in Binsar.
Table 6.8 Barking deer pellet group density (pellet groups/ha±SE) on different aspects in pre and post monsoon seasons in Binsar.

Table 6.9 Goral pellet group density (pellet groups/ha±SE) on different aspects in pre and post monsoon seasons in Binsar.

Table 6.10 Barking deer pellet group density (pellet groups/ha±SE) in different habitat during different seasons in Binsar.

Table 6.11 Goral pellet group density (pellet groups/ha±SE) in different habitat during different seasons in Binsar.

Table 7.1 Percent occurrence of fragments of tree, shrub and herb species within the identified browse fragments in faecal pellets of barking deer during pre monsoon and post monsoon season in 1998 in Binsar Wildlife Sanctuary.

Table 7.2 Percent occurrence of fragments of tree, shrub and herb species within the identified browse fragments in faecal pellets of goral during pre monsoon and post monsoon season in 1998 in Binsar Wildlife Sanctuary.

Table 7.3 95% Boneferroni confidence limits for available ($P_{io}$), and utilised proportion of different browse species ($P_{ie}$) in barking deer diet in pre and post monsoon seasons in Binsar Wildlife Sanctuary.

Table 7.4 95% Boneferroni confidence limits for available ($P_{io}$), and utilised proportion of different browse species ($P_{ie}$) in goral...
diet in pre and post monsoon seasons in Binsar Wildlife Sanctuary.

Table 8.1 Mean number of cut trees, lopped trees, cattle dung piles per plot, human population, livestock population and number of villages in and around surveyed oak patches in Kumaon Himalaya.

Table 8.2 Combined average values of all threat variables for each surveyed patch.

Table 8.3 Proportion available \((P_{io})\), proportion dead \((P_{ie})\) and 95% Bonferroni confidence limits for different plant species in Binsar.

Table 8.4 Proportion available \((P_{io})\) proportion dead \((P_{ie})\) and 95% Bonferroni confidence limits for six dominant tree species in different girth classes during post monsoon 1996.

Table 8.5 Number of tree species saplings and their percentages during 1996 and 1998.

Table 8.6 Number of tree species seedlings and their percentages during 1996 & 1998.
