Acknowledgements

"Of all the attitudes we can acquire, surely the attitude of gratitude is the most important and by far the most life-changing."

~ Zig Ziglar

I have many people to thank who have been the pillars on which my achievements stand. This would not have been possible without the kind support and help of many individuals and institutions.

At the outset, I graciously acknowledge my association with Prof. Agnes Madhuravani, who initiated me into research. I was extraordinarily fortunate in having ‘Agnes mam’ as my mentor at Maharani’s Science College. This would have been a distant reality but for her personal support and her prayers for which I am indebted to!

I would like to express my sincere gratitude to my guide Dr. D. J Bagyaraj for the immense knowledge he has bestowed on me along with his continuous support, patience, motivation and enthusiasm. His guidance helped me during the time of research and writing of this thesis. Institutions willingly opened their doors to me because of my association with him. I am privileged to have him as my advisor and mentor.

Besides my advisor, I would like to thank my doctoral committee members: Dr. Radha D. Kale and Dr. Harini Nagendra. Dr. Kale, for her insightful comments, discussions, expertise and most of all kindness. Dr. Harini, for her encouragement, support and hard questions. They were readily available to read and respond to my drafts of each chapter of my work more quickly than I could have hoped with helpful, constructive and apt comments.

My humble acknowledgement to all members of ATREE especially Dr. Gladwin Joseph, Dr. Ravi Chellam, Dr. Robert, Dr. Aravind Madhyastha and all the staff at ATREE for their gracious support. I would not have started on this journey without the flexibility that ATREE offered.

I gratefully acknowledge the Principals of my college Dr. B. L Bagyalakshmi and Prof. B. Lalithamma for their support and permission to undertake part of my research work at the Department of Microbiology.

Big thanks to Dr. Arun Jyothi Mathias, my colleague for his support. I have benefited by his advice and guidance.

I would like to show my greatest appreciation to my students: Ms. Juliet, Ms. Nagashree, Ms. Sapna, Ms. Indira, Ms. Vinutha, Ms. Kalpana, Ms. Nirupama, Ms. Sowjanya and Ms.
Pavithra for their help with my research work. It is a pleasure to convey my gratitude to them all.

I gratefully acknowledge the help from Prof. Chowdary for the identification of fungi.

I am highly indebted to Prof. Chandrashekar Nauniyal and Ms. Vasvi Chaudhary for readily accepting to do the analysis of my samples. I am grateful in every possible way and hope to continue our collaboration in future.

Thank you doesn’t seem sufficient but it is said with appreciation to Mr. Rajashekar for always lending a helping hand in finding research papers, Ms. Pavithra K. B for technical support and Zuari Chemicals for help with analysis of soil.

I want to thank my parents and my mother-in-law for being what they are. Above all, I thank my husband Anil Kumar Nair for encouraging me to undertake this endeavor from the start, and for his unconditional support every step of the way. I am indebted to him more than he knows. Thank you for allowing me to have this adventure.

Finally, a big ‘thank you’ to my daughter Ms. Amritha for giving me happiness and joy. This thesis is a small tribute to an exceptional daughter.

Each one of you stands acknowledged for the dream come true!

Kavitha
