LIST OF TABLES

Chapter III
Table 3.1 Frequency Distribution of Responses from Total 645 TSWs..........................61
Table 3.2 Frequency Distribution of Responses from 355 TSWs .................................62
Table 3.3 Frequency Distribution as per Sex and Work setting of the 260 TSWs ..............62
Table 3.4 Frequency Distribution as per Sex and Work setting of the 180 TSWs ..........63

Chapter IV
Table 4.1 Distribution of Respondents as per Socio-demographic and Occupational Variable .................................................................................................................................80
Table 4.2 Mean of Age of the Respondents as per Sex and Work Settings ...................85
Table 4.3 Mean of Work Experience of the Respondents as per Sex and Work Settings ...86
Table 4.4 Sex Wise Percentage Distribution of Respondents as per Salary and Work Settings ........................................................................................................................................86
Table 4.5 Mean of Work Experience of the Respondents as per Salary and Work Settings...87

Chapter V
Table 5.1 Distribution of Respondents for Top Five Stressors in Regard to Job Nature as per Work Settings .................................................................................................................................106
Table 5.2 Distribution of Respondents for Top Five Stressors in Regard to Job Nature as per Work Experience .................................................................................................................................107
Table 5.3 Distribution of Respondents for Top Five Stressors in Regard to Job Nature as per Job Type ........................................................................................................................................108
Table 5.4 Distribution of Respondents for the Top Five Individual/Personal Stressors as per Work Settings .................................................................................................................................112
Table 5.5 Distribution of Respondents for Top Five Organisational Stressors as per Work Settings........................................................................................................................................116
Table 5.6 Distribution of Respondents for Nature of Abuse by Clients* as per Work Settings ........................................................................................................................................117

Chapter VI
Table 6.1 Mann-Whitney U Test for Overall Occupational Stress and its Sub Components as per Sex of Respondents ......................................................................................................................123
Table 6.2 Mann-Whitney U Test for Overall Occupational Stress and its Sub Components as per Marital Status of Respondents ..................................................................................................................... 124
Table no. 6.3 Kruskal-Wallis Test for Overall Occupational Stress and its Sub Components as per work Settings of Respondents............................................................................................................. 125
Table 6.4 Kruskal-Wallis Test for Overall Occupational Stress and its Sub Components as per Education of Respondents.......................................................................................................................... 127
Table 6.5 Kruskal-Wallis Test for Overall Occupational Stress and its Sub Components as per Salary of Respondents............................................................................................................................. 129
Table 6.6 Kruskal-Wallis Test for Overall Occupational Stress and its Sub Components as per Job Level of Respondents......................................................................................................................... 130
Table 6.7 Kruskal-Wallis Test for Overall Occupational Stress and its Sub Components as per Job Type of Respondents ........................................................................................................................ 132
Table 6.8 Pearson Correlation between Stress (OSI) Scores and 12 Domains of OSI as per Work Experience .................................................................................................................................................. 133
Table 6.9 Pearson Correlation between Stress (OSI) Scores and 12 Domains of OSI as per Work Experience and Sex of Respondents ........................................................................................................... 134
Table 6.10 Pearson Correlation between Stress (OSI) Scores and 12 Domains of OSI as per Work Experience and Work Settings of Respondents ......................................................................................... 135

Chapter VII
Table 7.1 Friedman’s Two-Way Anova for Mean Rank Comparison of Various Ways of Coping .............................................................................................................................................................. 147
Table 7.1.a Friedman’s Two-Way Anova (Pairwise Comparison) of Mean Rank Comparison of Various Ways of Coping .............................................................................................................................................. 147
Table 7.2 Mann-Whitney U Test for Various Ways of Coping as per Sex of Respondents ................................................................................................................................................................. 149
Table 7.3 Mann-Whitney U Test for Various Ways of Coping as per Marital Status of Respondents ............................................................................................................................................................. 150
Table 7.4 Kruskal-Wallis Test for Various Ways of Coping as Per Work Settings of Respondents ............................................................................................................................................................. 151
Table 7.5 Kruskal-Wallis Test for Various Ways of Coping as per Education of Respondents ............................................................................................................................................................. 152
Table 7.6 Kruskal-Wallis Test for Various Ways of Coping as per Salary of Respondents ............................................................................................................................................................. 153
Table 7.7 Krushkal-Wallis Test for Various Ways of Coping as per Job Level of Respondents ................................................................. 154

Table 7.8 Krushkal-Wallis Test for Various Ways of Coping as per Job Type of Respondents ........................................................................................................... 155

Table 7.9 Spearman's Rho Correlation between all the Ways of Coping and Socio-Demographic Variables of Respondents ................................................................. 156

Table 7.10 Spearman's Rho Correlation between Sub Domains of Emotion Focused Ways of Coping and Socio-Demographic Variables of Respondents ......................................................... 157

Table 7.11 Spearman’s Rho Correlation between all the Ways of Coping and all the Sub Domains of Occupational Stress ................................................................................. 158
