Acknowledgement

I am grateful to Professor (Dr) Ammini Joseph, Dean, Faculty of Environmental Studies and Director, School of Environmental Studies, Cochin University of Science and technology, for meticulously guiding my research.

I am also thankful to Dr. A. Mohandas and Dr. V. N. Sivasankara Pillai, former Directors of School of Environmental Studies.

I acknowledge the cooperation and help rendered by all my colleagues, fellow researchers and every member of the School of Environmental Studies with gratitude.

I record my gratitude to Prof. Nazeema Beeevi, of 'All India Coordinated Research Project on Pesticide Residue, Vellayini Centre, Department of Entomology, Agricultural College, Vellayini, Trivandrum; Prof. L. Uma, Director, National Facility for Marine Cyanobacteria, Bharathidasan University, Thiruchirappally and Sri. N. Sanil of Electron Microscope Lab, CMFRI, Kochi.

R.Ramesh
Contents

Preface i

Chapter 1

Cyanobacteria of Paddy fields 1

1.1 Introduction 1

1.2 Enumeration of algal flora 3

1.2.1 Methodology 4

1.2.2 Observations 5

1.3 Discussion 8

Chapter 2

Pesticide Tolerance of Cyanobacteria 12

2.1 Introduction 12

2.2 Development of in vitro cultures 16

2.2.1 Characterization of the isolate – methodology 17

• Cell Structure 17

• Absorption spectra 18

• Growth kinetics 18

• pH Tolerance 19

• Bioactive property 19

• Nitrogenase activity 20

2.2.2 Characterization of the isolate – Observations 22

2.2.3 Identification of the isolate - Discussion 28

2.3 Algal tolerance of pesticides – in vitro studies 33

2.3.1 Methodology 34

• Range finding test 34

• Definitive test 34

• Statistical analysis 35
2.3.2 Results

- Monochrotophos
- Chlorpyriphos
- Malathion
- Fenvalarate
- Captan
- Mancozeb
- Carbendazim
- 2,4-D
- Glyphosate
- Bacterimycin

2.3.3 Discussion

Chapter 3

Soil algalization – interaction with pesticides

3.1 Introduction

3.2 Methodology

3.2.1 Soil algalization

3.2.2 Pesticide residue and algal growth

3.2.3 Pesticide leaching and algal growth

3.3 Results

3.3.1 Soil properties upon algalization

3.3.2 Fate of pesticide upon algalization

3.3.3 Leachate toxicity

3.4 Discussion

- Algalization
- Pesticide Residue
- Leachate toxicity
Chapter 4

Concerted stress from pesticide and salinity in paddy field

4.1 Introduction 85
4.2 Methodology 87
  4.2.1 Effect of Salinity on Synechococcus elongatus 87
  4.2.2 Salinity and pesticide interference 87
4.3 Results 88
  4.3.1 Effect of salinity on the growth of S.elongatus 88
  4.3.2 Salinity and pesticide interference on S.elongatus 89
    • Chlorpyriphos 89
    • Monochrotophos 91
    • Fenvalarate 92
    • Malathion 94
    • 2,4-D 95
    • Glyphosate 96
4.4 Discussion 98

Chapter 5

Summary and Conclusion 100
