ACKNOWLEDGEMENT

It gives me immense pleasure to realize that at long last, I have been able to complete the work that I should have done long before. This ‘mission critical’ would remain unaccomplished if there had not been some wonderful people whose efforts and encouragement have brought me to the culmination of my work, and I would like to take this opportunity to formally express my gratitude towards them.

No word is enough to say how thankful I am to my supervisor Dr. A. R. Fatihi. He was not only my guide in the present study, but he has been my mentor during a decade of relationship with him right from my undergraduate period at AMU. His tremendous hard work and dedication towards academic activities have always been inspirational to me. Besides, his amiable behavior and sincerity in all his efforts have earned him respect from all corners. I feel proud to have a teacher like him and feel extremely delighted to have worked under him in this study. I pray to the Almighty to shower him with all the rewards he deserves.

I take pride in showing my deep respect to all my esteemed teachers, particularly, Prof. Abdul Azim, Prof. Iqtidar H. Khan, Dr. Mobin Ahmed Khan, Dr. Mirza Khalil Ahmed Beg, Dr. S. Imtiaz Hasnain and Mr. Masood Ali Beg, who not only gave me strong foundation in the discipline, but also helped me through many difficult periods of my undergraduate and graduate studies at the
Department of Linguistics, AMU. Besides, the helping attitude of the staffs of the department and the friendly behavior of some senior brothers like Dr. Ekhtiar Ali, Dr. Jahangir Warsi and Dr. Aejaz Mohd. Sheikh have made my long relationship with the department extremely pleasant.

The contribution of my father-in-law Prof. Abu Sufian of the University of Bahrain has been tremendous. A scholar of international repute, his constant encouragement in academic pursuits has been instrumental in shaping myself as an academician. His suggestions and guidance have been particularly helpful for the experimental chapter. His tireless efforts in collecting some journal articles for me have enriched this work greatly.

I am very thankful to my respondents, students of Asian University of Bangladesh for their cooperation. I thank the university authority for allowing my research assistants to take the interviews. My sincere thanks to my research assistants, students of Department of English, Darul Ihsan University, Dhaka, for doing all the work. The contribution of Mahbub, Shahjahan, Robin, Sayeed, Sumon, Mukto etc. has been great for the completion of this work. I also thank Spondon Audio-Visual Centre and Al Manar Audio-Visual Centre for their help in recording television and radio advertisements.
I thank from the core of my heart Mr. Abdul Qader, Director of the National Broadcasting Authority of Bangladesh for his timely support in collecting some information from radio and television. I am also thankful to the Director, National Archives Bangladesh for allowing me to use their library.

I would like to thank my best friend Dr. Abu Hena Abid Zafy for his help and cooperation in all spheres of my life. He has been more than “a friend in need” and if he had not pulled me through in some extremely personal problems, I would not be able to come to this stage. Thanks to Taimur Reza Sharif, a Ph.D. research scholar at Jawaharlal Nehru University whose help at a very crucial stage of this work will always be remembered with deep appreciation. I also thank Sayeed, another research scholar of JNU for his support. I also appreciate the help of affectionate Khabir and Romel during the initial stage of my research.

I take this opportunity to show my deep respect to my parents to whom I dedicate this work. My heartfelt gratitude goes to my eldest two brothers Mamoon and Ameen whose contribution during my undergraduate and graduate studies helped me in great deal to shape my career.

It is my pleasure to express my sincere thanks to my beloved wife Shaheen who has always been at the receiving end due to my extreme busy schedule all these years. She not only made tremendous sacrifice during this time, but also
gave me encouragement all through. Without her patience and support, this work would never come to this stage.

This acknowledgement will be incomplete if I don't mention the names of my lovely two daughters Naba and Safa. They are the source of all my delight and happiness. Due to this work, I have deprived them from the fatherly love at times when they badly needed and deserved.

Finally my head bows to the Omnipotent Lord who has brought me to this level with His heavenly Blessings.

Abdullahis Salman Al-Azami
