ACKNOWLEDGEMENT

It gives me great pleasure to express my deep sense of gratitude to Dr. S.R. Joshi, Associate Professor, Department of Biotechnology and Bioinformatics, North-Eastern Hill University, Shillong for his untiring guidance, valuable suggestions and constant encouragement during the entire course of my research. His hard working nature, unconventional approach, openness and flexibility at accepting new ideas and creativity provided me with a perfect environment in which I was able to mould myself both at the personal and academic levels to achieve the very best and to explore new frontiers with devotion and confidence. His sacrifice of time and patience in listening to my ideas and problems, untiring suggestions and thoughtful criticisms are things that I would always cherish in the days to come.

I would also like to pay my respects to Prof. A. Chatterjee, Prof. S.R.Rao Prof. K. Aguan, Dr. A. Bhattacharjee, Ms. S. Majaw and Ms. N.Chaurasia faculty of the Department of Biotechnology and Bioinformatics, North-Eastern Hill University, Shillong for giving me an opportunity to pursue my PhD research in the department and for their help and guidance whenever necessary.

I sincerely acknowledge my thanks to Dr Jos Houbraken, CBS Fungal Biodiversity Centre, Utrecht, Netherlands for providing crucial insights into the taxonomy of the fungal isolates, Dr Hamide.Z. Senyuva of Ankara Test and Analysis Laboratory, Scientific and Technological Research Council of Turkey for providing the mycotoxin database developed by her and her co-workers, for the present study. Dr D. A. Padmanaban and Dr B. D. Shenoy, IMTECH, Chandigarh, India for their suggestions regarding phylogenetic analysis and database search. Dr Sudripta Das, Tocklai
Experimental Station, TRA, Jorhat, India for providing valuable suggestions to improve the PCR amplification of the target gene sequences.

I take this opportunity to thank my elder brother Mr. N.K. Bhagobaty, IASST, Guwahati for the help provided with the statistical analysis of the results. Mr K. Singh and Mr. K. K. Senapati of Central Instrumentation Facility, IIT-Guwahati for their help with the LC-MS analysis of the fungal extracts.

I am thankful to the office and technical staff of the department for their constant help and support. I am also thankful to the UGC-UPE Biosciences Programme of our university for the support provided to our laboratory in the department which assisted in meeting some of the requirements of chemicals for the present study.

No words of thanks are enough for my labmates and friends Rakshak, Purabi, George, Barnali, Polashree, Sharmila, Santosh, Gopal, Abhishek, Nitin, Radhika and others for making the entire period of work a truly enjoyable and memorable one.

The acknowledgement will be incomplete if I do not mention the role of my parents in making me what I am today. My family has been a constant source of energy for me and I thank them for their unconditional support, love and faith in me.

Apart from the above-mentioned names, I would also like to thank all the people who have, in some way or the other helped me in the successful completion of my research work. Lastly, but not the least, I am thankful to Mr. Ujjal Das and Mrs. Nomita Das for their painstaking efforts in putting the manuscript to print, within a very short span of time.

Ranjan Kumar Bhagobaty
