ACKNOWLEDGMENTS

First, I bow in reverence to the Almighty Allah, the most Merciful, the Beneficial, for it is indeed his blessings alone which provided me enough zeal to complete this research work.

Initially, I would like to acknowledge late Sir Syed Ahmad Khan, founder of this great seat of learning (Aligarh Muslim University). His noble vision led to happiness and growth of the society through the development of education, services and health care. His motivating force has been a source of constant inspiration to me.

The scientific world is an opened-door community. As such, this body of work is not solely the result of an individual effort, rather it is the melding of a number of ideas and perspectives. The pursuit of obtaining the Ph.D. represents a culmination of maturity on multiple levels. Likewise, a mentor accepting students shares in this responsibility by enabling the student to mature as a scientist by providing valuable experimental knowledge and guidance. From this vantage point, I express reverence and gratitude to my supervisor Prof. Javed Musarrat, Chairman, Department of Agricultural Microbiology, A.M.U., Aligarh, whom has encouraged my creativity and scientific independence. Most importantly, as a scientist, Prof. Javed Musarrat always has creative ideas towards project design and experimentation. In my impression, he is also a person who always holds a reasonably optimistic attitude towards research as well as daily life and the human society. Thank you Sir, for keeping a watchful and discerning eye over my doctoral work, providing valuable guidance, and helping in overcoming the hurdles throughout.

I would be failing in my duties if I forgot to thank Dr. Alok Dhawan, my collaborator at IITR, Lucknow, India, for providing me his lab facility. I am also thankful to Dr. Yogeshwer Shukla and Dr. A.B. Pant for their kind help during my stay at IITR. I am also thankful to Dr. Jamal Mustafa (AMU) and Dr. Jamal M. Arif (Integral University, Lucknow) for extending their kind help and cooperation.

I express my deep sense of gratitude to my teachers Prof. Akhtar Haseeb, Prof. P.Q. Rizvi, Dr. Iqbal Ahmad, Dr. Abdul Malik, Dr. Mohd. Saghir Khan, Dr. (Mrs.) Alams Zaidi for their valuable suggestions.

I earnestly thank Mr. Fazlur Rahman Khan, Ms. Shaba Qamar Ansari and Ms. Nishat Afza for their invaluable help and issue of chemicals and glassware's.

Many thanks to my seniors Dr. Mateen Ahmad Khan, Dr. (Mrs.) Nazneen Bano, Dr. Masood Ahmad Khan, Dr. (Mrs.) Asma Aleem, Dr. Farrukh Aqil and Dr. Farah Ahmad for their suggestions and technical guidance.
