“Life is a journey and everyday is a new milestone of it”. With these words in mind, at the end of my PhD research tenure, I would like to express my gratitude to all those people whose love and support helped me to realize this dream in reality.

The first and foremost name that crosses my mind is that of my mentor and supervisor, Prof. Anupam Chatterjee. He introduced me to the field of cancer genetics; it was an invaluable experience to work under his guidance. His incessant encouragement, constructive criticism, indefatigable supervision helped me immensely during the entire period of my research work. Hard work, devotion and sincerity for research—these virtues are the core of your personality sir. Whatever I am today and whatever I will be as a researcher is because of you sir. I owe a lot to you.

I would like to thank the present Head Prof R.N.K. Horoo and former heads, Prof. B.B.P. Gupta and Prof. S.B. Prasad for providing me all the laboratory facilities for completing my research work. My heartiest thanks to all the faculties of zoology for their help. I would also like to thank to the Head, Department of Biotechnology & Bioinformatics for allowing me to use the laboratory facilities. My thanks to the office staff of both the departments for their help.

I express my gratitude to all the patients who participated in this study and permitted me to use their blood / tissue material. My prayers for their good recovery from cancer. I am also very much indebted to Dr. Rangad, Dr. M. Islam and their supporting staff, Nazareth Hospital, Shillong and also to Dr Vandana Raphael, Dr. K. Lynrah, NEIGRIHMS in collection of tissue biopsy / blood sample which was most essential component of my research. I also wish to thank the Director, BBCI Guwahati for his support. My sincere thanks to my colleagues Deb and Jalal for their support.

My special thanks and deep sense of gratitude to all my labmates- Sanjib Dada, Biplob, Allen, Geetanjali, Abhishek, Nitin, Radhika, Sillarine, Atanu, Pallavi for always helping me unconditionally throughout my research endeavour. I appreciate their stress busting ways to make the lab a pleasant place!
I want to express my gratitude to all my hostel friends especially Pramod, Sujit, Bibhuti, Ratul, Anup, Lalit, Manas, Arun, Dhriti and all others whose name I am unable to recollect at this moment. This was the first time when I experienced hostel life and enjoyed the finer moments of academic life which I shall always cherish.

I hereby express unending indebtedness to my Babuji, Amma, Bade bhaiya, Bittu bhaiya, sister Satya who had been with me through all the ups and downs of my life and realising my dream as their dreams. Any word will be too small to express my emotions for all the love and care I had received from them. My deep sense of gratitude for badi bhabhi, chotti bhabhi, my nephew and nieces Madhu, Harsh, Adi, Badi Bua, cousins Tara, Kanak, Bimpi, Dimpi and to all the members of our extended family.

My words will never end to describe my thankfulfulness to Iba for her understanding and support for me in her best possible way through all the times, to her Pa, Mei, Hep for their unconditional care. I would also like to thank Dr S W Dhar, his entire family and mei duh duh, paduh and family for their support. Words cannot even begin to describe my emotion for our Shraddha (Rima) who is the source of joy and constant encouragement in every moment of our life.

I acknowledge the financial grant accorded to Prof A. Chatterjee by Department of Biotechnology, Government of India, New Delhi, which supported this research project and my fellowship as JRF and SRF. UGC-Meritorious Research fellowship granted to me in Department of Zoology, NEHU, Shillong.

Finally last but by no means the least thanks to the divine reality whose unforeseen presence is exhibited in all our endeavours and whose words in “Srimad Bhagwat Geeta” are the guiding principle to any human being for an eternal life.

Avdhesh
