Acknowledgements

This thesis arose in part out of years of research that has been done since I joined the research in the department of physical health & sports education (A.M.U.). By that time, I have worked with a great number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place I would like to record my gratitude to Professor Jaaowad Ali, Chairman, Department of Physical health & Sports Education A.M.U., Aligarh for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. His truly scientist intuition has made him as a constant oasis of ideas, which exceptionally inspired and enriched my growth as a student, a researcher and as a social scientist. The present work has culminated due to his meticulous guidance, constant inspiration and most of all his enthusiasm for perfection and completion of this work. I am indebted to him more than he knows.

Many thanks go in particular to the members of Organizing Committee members of North Zone Intervarsity Hockey tournament, Aligarh Muslim University, Managers, Coaches and players of various University teams who extended their valuable help and co-operation during the course of data collection.

I like to present my special thanks to all my respected teachers of the department for their valuable guidance and encouragement for this academic pursuit.
My special thanks to Mr. Anwar Ahmad, Mr. Ashok Kumar and non-teaching staff of the department for their help and co-operation.

I also grasp this opportunity to express my deephearted thanks to my friend Md. Ahsan and all other friends who generously helped me throughout the work as and when required.

Words are inadequate to express my gratitude to Prof. Akbar Hussain, Department of Psychology. I also owe my thanks to Dr. Haseeb Akhtar, Lecturer Department of Statistics & Operational Research, A.M.U., for his valuable suggestions and help in terms of statistical treatment of data.

My sincere tribute also to Mr. Malik Hayat Hashmi, Computer Centre, (A.M.U.).

I would also like to sincerely acknowledge to Mr. Jaseem Baig who made it possible to bring out the presentable printout of the thesis.

With extreme care of my heart I most faithfully acknowledge the love, affection and blessings that I have received from my parents, uncle S. Ahmad, brother and sisters and all those without whose contribution this empirical work would have not seen the light of the day.

(Sayed Khurram Nisar)
