ACKNOWLEDGEMENT

I am greatly indebted to my supervisor, Dr. Moazziz Ali Beg, Reader in Psychology, under whose guidance this study was originally undertaken. I also express my sincere gratitude to Prof. Jameel Qadri who subsequently guided me at every step to complete this project. Without his keen interest, expert guidance and valuable suggestions this work would not have been completed. I am equally beholden to Prof. Anwar Ansari, Head, Department of Psychology who not only encouraged me and provided all possible facilities during the course of this study but also spared his valuable time to enlighten me with his critical and scholarly suggestions on certain aspects of this thesis. Last but not the least, I am extremely grateful to Dr. Saeeduzzafar, Lecturer in Psychology who took a lot of pains in discussing the minutest details of this work with me. His critical advice and a thorough review of the results of this study went a long way in improving the work. My most sincere thanks are due to Miss Shams Zehra Rizvi who helped me in a number of ways during this study.

I shall be failing in my duty if I do not thank Mr Zaidi who very neatly and correctly typed this thesis.

Abu Sufiyan Zilli
