3.1.4. Climate and Monsoon 23
3.1.5. Hydrology 24
3.1.6. Flora and Fauna 24
3.1.7. Protected Areas 26

3.2. Study Area 27
3.2.1. North Andaman 27
3.2.2. Middle Andaman 28
3.2.3. South Andaman 28
3.2.4. Rutland 32
3.2.5. Little Andaman 32

CHAPTER 4

METHODOLOGY 35

4.1. Freshwater Survey 35
4.1.1. Selection of streams 35
4.1.2. Classification of stream size 35

4.2. Fish Sampling 36
4.3. Fish Collection and Preservation 36
4.4. Fish Measurement 37
4.5. Fish Identification 37
4.6. Distribution and Biogeography of fishes 37
4.7. Habitat measurement 38
4.8. Fish Diversity and relative abundance 39
4.9. The accumulation of species with sampling effort and number of individuals 39
4.10. Rarity and commonness
4.11. Beta diversity or species turnover
4.12. Habitat associations of fishes
4.13. Effect of invasive species

CHAPTER 5
RESULTS
5.1. Sampled streams
5.2. Freshwater fish inventory
5.2.1. Species richness and diversity
5.3. Ecology and morphology of native species
5.4. Distribution and Biogeography
5.4.1. Biogeographical distribution
5.4.2. Regional distribution
5.4.3. Local distribution
5.5. Fish community structure
5.6. Rarity and commonness
5.7. New findings and endemism
5.8. Beta Diversity or Species turnover
5.9. Species similarity
5.10. Habitat associations
5.10.1. Species diversity and stream size
5.10.2. Species diversity-habitat associations
5.10.3. Species –habitat associations
CHAPTER 6

DISCUSSION

6.1. Freshwater fish survey

6.2. Fish inventory and earlier surveys

6.3. Ecology and morphology of native species

6.4. Distribution and Biogeography

6.5. Species diversity and community structure

6.6. Beta diversity or species turnover

6.7. Habitat associations

6.8. Threats to Andaman freshwater fishes

6.8.1. Introduced species

6.8.2. Pollution

6.8.3. Habitat alterations

6.9. Management of rare and endangered species

6.10. Management of fresh water biodiversity

CHAPTER 7

SUMMARY AND CONCLUSION
