CONTENTS

Acknowledgements i
List of Tables iv
List of Figures viii

Chapter 1: Introduction
1.1 General Introduction 1
1.2 Rationale 8
1.3 Objectives of the study 9

Chapter 2: Study Area
2.1 Historical background of the Sanctuary and Wolves 11
2.2 Land use pattern 14
2.3 Climate 15
2.4 Soil 16
2.5 Topography 16
2.6 The Sanctuary 18
2.7 Flora 20
2.8 Fauna 21
2.9 People 22

Chapter 3: Estimation of Prey Base
3.1 Introduction 23
3.2 A brief review of distance sampling 25
3.3 A brief description of species 26
3.3.1 Blackbuck (Antilope cervicapra) 26
3.3.2 Blacknaped Hare (Lepus nigriceps) 27
3.4 Application of distance sampling for the present study 29
3.5 Methodology 31
3.5.1 Total counts: Blackbuck 31
3.5.2 Line transect sampling 31
3.5.3 Light based road transects 33
3.5.4 Spot light circular plot method 33
3.5.5 Analytical methods 34
3.6 Results 35
3.6.1 Blackbuck (Antilope cervicapra) 35
3.6.1.1 Population size 35
3.6.1.2 Population structure 36
3.6.1.3 Sex ratio 36
3.6.1.4 Observation on transects 37
3.6.1.5 Distance Models for 39
   A) All animals 39
   B) All males 43
   C) Adult males 47
   D) Sub-adult males 51
   E) Territorial males 54
   F) All females 57
   G) Adult females 61
   H) Sub-adult females 64
   I) Fawns 67

Contents
3.6.2 Blacknaped Hare (*Lepus nigricollis*)

3.6.2.1 Light based road transects

3.6.2.2 Spot light circular plot method

3.7 Discussion

3.7.1 Distance sampling and present study

3.7.2 Population structure and density of blackbuck

3.7.3 Model selection based on AIC criteria

3.7.4 Blacknaped hare density estimation

3.7.5 Conclusions

Chapter 4: Feeding Ecology

4.1 Introduction

4.2 Study packs

4.3 Methodology

4.3.1 Scat analysis

4.3.2 Identification of Wolf scats

4.3.3 Collection and preservation of scats

4.3.4 Identification of prey remains from scats

4.3.5 Sample size estimation for min. no. of hair/scat

4.3.6 Sample size estimation for min. no. of scats/pack

4.3.7 Food resource partitioning

4.4 Data analysis

4.5 Results

4.5.1 Sample size estimation for min. no. of hairs/scat

4.5.2 Sample size estimation for min. no. of scats/pack

4.5.3 Diet diversity

4.5.4 Food habits of different Wolf Packs

4.5.4.1 Angar Pack

4.5.4.2 Anjangaon Pack

4.5.4.3 Bhutashte Pack

4.5.4.4 Boramani Pack

4.5.4.5 Gangewadi Pack

4.5.4.6 Gherdi Pack

4.5.4.7 Karmala Pack

4.5.4.8 Katti Pack

4.5.4.9 Khombaj Pack

4.5.4.10 Korti Pack

4.5.4.11 Nannaj Pack

4.5.4.12 Sangvi Pack

4.5.4.13 Chapalgaon Pack

4.5.4.14 Rehekuri Pack

4.5.5 Food habits of wolves

4.5.6 Seasonal food habits

4.5.6.1 Nannaj Pack

4.5.6.2 Gangewadi Pack

4.5.7 Comparison of food habits (protected/un-protected)

4.5.8 Seasonal food habits (protected/un-protected)

4.5.8.1 Winter

4.5.8.2 Summer

4.5.8.3 Monsoon

4.5.9 Niche overlap across seasons
4.6 Discussion
4.6.1 Min. no. of hair/scat & scats/pack 140
4.6.2 Annual food habits of wolves 143
4.6.3 Seasonal food habits and prey switching 146
4.6.4 Comparison of food habits (protected/un-protected) 148
4.6.5 Fruits as a potential buffer food 148

Chapter 5: Predation
5.1 Introduction 150
5.2 Methodology 153
5.2.1 Blackbuck and Blacknaped hare inside core areas 153
5.2.2 Blackbuck and Blacknaped hare outside core areas 153
5.2.3 Estimation of cattle population 154
5.2.4 Estimation of weights of different prey species 154
5.2.5 Trapping and radio-collaring 155
5.2.6 Continuous monitoring and quantification of predation 156
5.2.7 Identification of kills 157
5.3 Results 158
5.3.1 Prey availability 158
5.3.2 Predation 160
5.3.2.1 Hunting strategy 160
5.3.2.2 Predation efforts by Nannaj Pack 163
5.3.2.3 Kill composition 163
5.3.2.4 Biomass consumption 164
5.3.2.5 Kill interval 164
5.3.2.6 Consumption per wolf per kill 165
5.3.2.7 Consumption per wolf per day 165
5.3.2.8 Predation pressure 166
5.3.2.9 Predation patterns 168
5.3.3 Location of kills in relation to Sanctuary limits 173
5.3.4 Kill location in relation to nearest vegetation cover 175
5.3.5 Livestock guarding and predation 177
5.3.6 Assessment of economic loss 178
5.3.7 Food caching 180
5.4 Discussion 180
5.4.1 Prey availability 180
5.4.2 Contribution of different prey species 181
5.4.3 Kill interval 183
5.4.4 Consumption 184
5.4.5 Food caching 185

Chapter 6: Ranging Patterns of Wolves
6.1 Introduction 186
6.2 Field methods 188
6.3 Data analysis 189
6.4 Results 190
6.4.1 Pack home ranges 190
6.4.2 Individual home ranges 191
6.4.3 Home range overlaps 192
6.4.4 Seasonal variation in home range 192
6.4.5 Home range variation (breeding female/collared helper) 193
6.5 Discussion 194
## Chapter 7: Denning Behaviour

7.1 Introduction 199  
7.2 Materials and methods 200  
7.2.1 Radio-tracking sessions 200  
7.2.2 Locating denning sites 200  
7.2.3 Observation on dens 201  
7.2.4 Categorisation of disturbance, pup age, land & den shifting 202  
7.3 Statistical analysis 203  
7.4 Results 204  
7.5 Discussion 219

## Chapter 8: Modeling Wolf Distribution in the GIB Sanctuary

8.1 Introduction 214  
8.2 Niche based models from presence only data 214  
8.3 Maxent 217  
8.4 Methods 219  
8.4.1 Maxent details 219  
8.5 Data Sources 220  
8.5.1 Study species 220  
8.5.2 Environmental variables 220  
8.6 Model building 221  
8.7 Model Evaluation 223  
8.8 ROC curves 226  
8.9 Results 226  
8.10 Discussion 230  

### Conclusion
