Acknowledgement

This acknowledgement will hardly justify my sense of profound veneration for my guides Dr. (Mrs.) Nilofer Khan, Director, Institute of Home Science, University of Kashmir and Dr. Imtiyaz Ali, Professor and Head, Department of Community Medicine, SKIMS for their inspiration, valuable guidance, witful criticism and constructive suggestions so often sought and so generally given at the cost of their personal convenience. I extend my deep regards and immense indebtedness to them for providing incessant help and proper visualisation in a magniloquent style. Without their didactic tutelage, unstinted help it would have been scarcely possible to accomplish this piece of work.

I feel pleasure in expressing my sincere thanks to Mr. Tariq Wani, Ex-Statistician, Department of Community Medicine, SKIMS for his help in statistical analysis.

My thanks are due to librarians of Institute of Home Science, Kashmir University, Government Women’s College, M. A. Road, National Medical Library and INSDOC, Nutrition Foundation of India, New Delhi for being kind enough to provide me literature which enabled me to complete the thesis. Thanks are due to Wattan Publications also.

I wish to extend my special thanks to all the respondents, who formed the basis of my study.

I acknowledge the everlasting sweet memories of my respected father whose blessings brought me here upto and left indelible mark on me.

A special note of gratitude is offered to all my family members who bestowed their blessings, encouragement and support. I find no words too complementary to acknowledge help and inspiration rendered by my husband Javed Ahmed Kawoosa in making this effort a success. My children Aatir and Areeb need loving reference who had to share every moment of my struggle.

I am also thankful to Mr. Vijay Sas (M/s Aditya Group) and Mr. Abdul Majeed Dar for typing the manuscripts neatly and meticulously.

Nighat Nasreen
