I express my sincere gratitude and indebtedness to my research guide, Dr. S. Kothandaraman, Professor and Head, Dept. of Civil Engineering, PEC, for providing the opportunity to complete my Ph.D studies under his exceptional guidance. Without his untiring patience, constant encouragement, guidance, and knowledge this work would not have been possible. Not only did he direct my learning and research as a student, but he also played the very important role of a mentor. I want to thank him for the support, he has provided me, and for all the opportunities he has created during the last five years for me to grow as a professional and as a person. My academic and general discussions with him have broadened my vision and given me new insight into many areas of engineering design, philosophy, and history.

Special thanks go to Dr. D. Govindarajulu, Professor, CE, PEC, and Dr. M. A. Sivasankaran, Professor, CE, PEC, who have been the constant source of caring and inspiration for their helpful guidance and encouragement. I would like to thank The Principal, Pondicherry Engineering College for extending all possible supports to carry out this research work.

I extend my sincere thanks to Dr. T. Sundararajan, Professor, CE, PEC, and Dr. R. Panneerselvam, Dean, School of Management, Pondicherry University, Members of Doctoral Committee and I am grateful for their willingness to serve on my doctoral
committee and for having provided valuable and constructive suggestions during various stages of progress of this research work.

Sincere and great appreciation goes to Dr. V. L. Narasimha, Professor, CE, PEC, and all the Faculty Members of Department of Civil Engineering for their constant inspiration and moral support. Special thanks go to my friend Dr. P. Revathi, Lecturer, CE, PEC, for her cordial and valuable suggestions. I would also like to thank Dr. K. Pandurangan, Assistant Professor, CE, PEC, for his kindly help to collect literature.

I express my thanks to the technical staff of Concrete Laboratory for their help to complete my laboratory work in time. Especially, I thank Mr. M. Ponnusamy and Mr. S. Mohan for their help and co-operation.

The financial support of the Department of Science and Technology, Govt. of India, New Delhi, was instrumental for this research. I would also like to thank Department of Earth Science and Central Instrumentation Facility, Pondicherry University, for their help to carry out XRD and SEM analysis.

Last but not the least, I would like to thank my dear husband Mr. A. Kalaiselvane, Assistant Professor, ME, PEC, who has been the source of love, companionship, encouragement and made my life rich and complete. I am especially grateful for the countless sacrifices made by my family members especially my beloved children K. Vishali and K. Mugilan to ensure that I can pursue my dreams and for always being there for me.

Muthadhi
