LIST OF TABLES

Table 1. Major global fish harvesters (Capture plus aquaculture) in metric tons. 2000. (Source: FAO 2003).
Table 2. Fish species captured in Pondicherry coastal water during 2007.
Table 3. Macroscopic and histological description of the developmental stages of gonad of Female *Leiognathus dussumieri* and *Secutor insidiator*.
Table 4. Macroscopic and histological description of the developmental Stages of gonad of Male *Leiognathus dussumieri* and *Secutor insidiator*.
Table 5a. Month wise sex ratio of *Leiognathus dussumieri*.
Table 5b. Month wise sex ratio of *Secutor insidiator*.
Table 6a. Lipid content of liver of *Leiognathus dussumieri* different stages of maturity (as percentage of dry weight).
Table 6b. Lipid content of lateral muscle of *Leiognathus dussumieri* different stages of maturity (as percentage of dry weight).
Table 6c. Lipid content of ovary of *Leiognathus dussumieri* different stages of maturity (as percentage of dry weight).
Table 7a. Lipid content of liver of *Secutor insidiator* different stages of maturity (as percentage of dry weight).
Table 7b. Lipid content of ovary of *Secutor insidiator* different stages of maturity (as percentage of dry weight).
Table 7c. Lipid content of lateral muscle of *Secutor insidiator* different stages of maturity (as percentage of dry weight).

Table 8a. Fatty acid profile of immature, maturing, mature and spent ovaries of *Leiognathus dussumieri*.

Table 8b. Fatty acid profile of liver of immature, maturing, mature, spent and muscle of adult female *Leiognathus dussumieri*.

Table 9a. Fatty acid profile of immature, maturing, mature and spent ovaries of *Secutor insidiator*.

Table 9b. Fatty acid profile of liver of immature, maturing, mature, spent and muscle of adult female *Secutor insidiator*.

Table 10a. Monthly mean relative coefficient of condition for male and female *Leiognathus dussumieri*.

Table 10b. Monthly mean relative coefficient of condition for male and female *Secutor insidiator*.

Table 11a. Growth parameters of male and female *Secutor insidiator* obtained from different methods from the length frequency data.

Table 11b. Growth parameters of male and female *Leiognathus dussumieri* obtained from different methods from the length frequency data.

Table 12a. Growth parameters of male and female *Secutor insidiator* obtained from von Bertalanffy methods from the length at age data.

Table 12b. Growth parameters of male and female *Leiognathus dussumieri* obtained from von Bertalanffy methods from the length at age data.

Table 13a. Longevity of male and female *Secutor insidiator*.

Table 13b. Longevity of male and female *Leiognathus dussumieri*.
